TRANSAMERICA LIFE (BERMUDA) LTD.

DIRECTORS' REPORT

The directors herein present their report and the audited financial statements of Transamerica Life (Bermuda) Ltd. (the "Company", the "insurer" or "TLB") for the year ended December 31, 2018.

Profit or loss of the insurer for the financial year and the state of the insurer's affairs as at the end thereof:

The profit for the year of the insurer as set out in the Statement of Profit or Loss and Other Comprehensive Income is US$74,459,000. The state of affairs of the insurer is as set out in the statement of financial position and the accompanying notes.

(a) The principal activities of the insurer and of its subsidiaries in the course of the financial year and any significant change in those activities in that year;

The Company provides life insurance including term and universal life, annuity, personal accident and hospital indemnity coverages, which are distributed through a network of independent agents, brokers, financial advisors and telemarketers. The Company's products are primarily distributed in Hong Kong and Singapore. The Company is involved in ceding business to affiliated and unaffiliated companies.

(b) The amount, if any, which the directors recommend should be paid by way of dividend;

The directors approved a dividend of US$25,001,760 which was paid in December 2018.

(c) The amount, if any, which the directors propose to carry to reserves;

Details of the reserves of the Company during the year are set out in the Statement of Changes to Shareholder's Equity.

(d) If the insurer has no subsidiaries and has in the financial year made donations for charitable or other purposes to a total amount of not less than US$128 or its equivalent, state the total amount of such donations;

Not applicable.

(e) If the insurer has subsidiaries and the insurer and its subsidiaries have between them made donations for charitable or other purposes to a total amount of not less than US$128 or its equivalent, state the total amount of such donations;

Not applicable.

(f) If significant changes in the assets of the insurer or of any of its subsidiaries have occurred in the financial year, contain particulars of the changes;

Not applicable.

(g) If, in the financial year, the Company has issued any shares, state the reason for making the issue, the classes of shares issued and, as respects each class of shares, the number issued and the consideration received by the insurer for the issue;

Not applicable.

(h) If, in the financial year, the insurer has issued or redeemed any debentures, state the reason for making the issue or redemption, the classes of debentures issued or redeemed and, as respects each class of debentures, the amount issued or redeemed and the consideration received by the insurer;

Not applicable.

(i) State the names of the persons who, at any time during the financial year, were directors or controllers of the insurer;

Directors	Appointment Date
Ronald F. Mosher	August 16, 2005
Marc R. Lieberman	June 13, 2016
Andrew G. Kanelos	June 13, 2016

Janita K. Burke	June 13, 2016
Andrew J. Byrne	October 1, 2016

Controllers	Effective Date
Donald J. Shepard	December 31, 2015
Alex R. Wynaendts	April 23, 2008
Mark W. Mullin	January 1, 2010
C. Michiel van Katwijk	September 30, 2015
Blake S. Bostwick	March 11, 2016
Marc R. Lieberman	June 13, 2016
Andrew G. Kanelos	June 13, 2016
Transamerica Corporation	May 27, 2005
The AEGON Trust	May 27, 2005
AEGON International B.V.	May 27, 2005
AEGON N.V.	May 27, 2005
Transamerica Life Insurance Company	October 1, 2008
Commonwealth General Corporation	September 30, 2015

(j) If, at the end of the financial year, there subsists a contract with the insurer or with the insurer's subsidiary or holding company or any subsidiary of the insurer's holding company in which a director or controller of the insurer has, or at any time in that year had, in any way, whether directly or indirectly, an interest, or there has, at any time in that year, subsisted a contract with the insurer in which a director or controller of the insurer had, at any time in that year, in any way, whether directly or indirectly, an interest (being, in either case, in the opinion of the directors, a contract of significance in relation to the insurer's business and in which the director's or controller's interest is or was material), contain:

(i) a statement of the fact of the contract's subsisting or, as the case may be, having subsisted;

The Company is party to a Consulting and Administrative Services Agreement (contract) with Transamerica Life Insurance Company ("TLIC"), AEGON N.V., AGEON ASSET MANAGEMENT (ASIA) LIMITED ("AAMAL") and AEGON INSIGHTS LIMITED ("AI"), and an Investment Management Agreement (contract) with AEGON USA Investment Management, LLC ("AUIM").

The Company is party to a coinsurance agreement (agreement) with TLIC and a reinsurance agreement (agreement) with Blue Square Re N.V. (BSRe).

(ii) the names of the parties to the contracts (other than the insurer);

1. TLIC
2. AEGON N.V. and its subsidiary, AEGON ASIA B.V.
3. AI
4. AUIM
5. BSRe
6. AAMAL

(iii) the name of the director or controller (if not a party to the contract);

Not applicable.

(iv) an indication of the nature and value of the contract; and

1. The nature of the contract is for TLIC to provide for various types of services incidental to the conduct of the insurance business engaged in by the Company. In addition there is a coinsurance and fee agreement with TLIC. See (k) below for value of the contract.
2. The nature of the contract is for AEGON N.V. to provide for various types of services incidental to the conduct of the insurance business engaged in by the Company. See (k) below for value of the contract.
3. The nature of the contract is for the Company to provide for various types of services incidental to the conduct of the business engaged in by AI. See (k) below for value of the contract.
4. The nature of the contract is for AEGON ASIA B.V. to provide for various types of services incidental to the conduct of the insurance business engaged in by the Company. See (k) below for value of the contract.
5. The nature of the contract is for AUIM to provide investment services incidental to the conduct of the insurance business engaged in by the Company. See (k) below for value of the contract.
6. There is a reinsurance agreement with BSRe. See (k) below for value of the contract.
7. The nature of the contract is for the Company to provide for various types of services incidental to the conduct of the business engaged in by AAMAL. See (k) below for value of the contract.

(v) an indication of the nature and value of the director's or controller's interest in the contract;

1. 100%
2. 100%
3. 100%
4. 100%
5. 100%
6. 100%

(k) The amounts of any property transferred, payments made (whether for services or otherwise), loans advanced to or obligations assumed during the financial year by or for a director or controller of the insurer or his nominees or associates;

1. Payments made to TLIC under a Consulting and Administrative Services Agreement in 2018 – US$4,037,544. Payment due to TLIC for fourth quarter 2018 under a Consulting and Administrative Services Agreement but paid in 2019 – US$901,098. Payment made to TLIC under a Fee Agreement in 2018 – US$584,005. Payment due to TLIC for fourth quarter 2018 under a Fee Agreement but paid in 2019 – US$147,383. Receipts from TLIC under a coinsurance Agreement in 2018 – US$54,392,014. Receipts from TLIC for fourth quarter 2018 under a Coinsurance Agreement but received in 2019 – US$8,976,712.

2. Payments made to AEGON N.V. under a Consulting and Administrative Services Agreement in 2018 – US$1,548,719. Payment due to AEGON N.V. for fourth quarter 2018 under a Consulting and Administrative Services but paid in 2019 – US$476,349.

3. Receipts from AI under a Consulting and Administrative Services Agreement in 2018 – US$174,818. Receipt due from AEGON INSIGHTS for fourth quarter 2018 under a Consulting and Administrative Services Agreement but received in 2019 – US$90,022.

4. Payments made to AEGON ASIA B.V. under a Consulting and Administrative Services Agreement in 2018 – US$3,058,669. Receipt due from AEGON ASIA for fourth quarter 2018 under a Consulting and Administrative Services Agreement but received in 2019 – US$18,329.

5. Payments made to AUIM under an Investment Management Agreement in 2018 – US$7,024,709. Payment due to AUIM for fourth quarter 2018 fee under an Investment Management Agreement but paid in 2019 – US$1,848,076.

6. Payments made to BSRe under a reinsurance Agreement in 2018 – US$2,116,188. Payment due to BSRe for fourth quarter 2018 under a Coinsurance Agreement but paid in 2019 – US$981,798.

7. Receipts from AAMAL under a Consulting and Administrative Services Agreement in 2018 – US$1,931. Receipt due from AEGON ASSET MANAGEMENT (ASIA) LTD for fourth quarter 2018 but received in 2019 – US$934.

(l) **If, at the end of the financial year, there subsist arrangements to which the insurer or the insurer's subsidiary or holding company or a subsidiary of the insurer's holding company is a party, being arrangements whose objects are, or one of whose objects is, to enable directors or controllers of the insurer to acquire benefits by means of the acquisition of shares in, or debentures of, the insurer or any other body corporate, or there have, at any time in that year, subsisted such arrangements as aforesaid to which the insurer was a party, contain a statement explaining the effect of the arrangements and giving the names of the persons who at any time in that year were directors or controllers of the insurer and held, or whose nominees held, shares or debentures acquired in pursuance of the arrangements;**

Not applicable.

(m) **If, at the end of the financial year, the insurer, or the insurer together with any associate or through a nominee is entitled to exercise or control the exercise of one third or more of the voting power of any body corporate, state the name of the body corporate, the country of its incorporation, its principal business activity, the number of shares so held and the number issued, the amounts owing to the body corporate by the insurer and owing to the insurer by the body corporate at the end of the financial year;**

None.

(n) **State whether the insurer has, in the financial year, carried on insurance business (other than reinsurance business) relating to liabilities or risks in respect of which persons are required to be insured;**

None.

(o) **Summary of the material reinsurance arrangements effected by the insurer;**

TLB is involved in the following cessions of risks to other companies, including third party reinsurers and affiliated companies. Risks are reinsured to other companies to permit the recovery of a portion of the direct losses incurred. TLB remains liable to the extent the reinsuring companies do not meet their obligations under these reinsurance treaties.

The following three summary tables describe the third party reinsurance arrangements TLB is involved with for Universal Life, Term Life and Facultative policies, ceded to third party reinsurer. These treaties are YRT (yearly renewable term), with reinsurance premium rate stated in the appendix of the treaties. Policies within the treaty cover scope and automatic binding limit, with issue dates falling between the start date and end date will be covered under the treaty. Facultative cases will require reinsurer additional approval.

(o) Summary of the material reinsurance arrangements effected by the insurer; (continued)

Third Party Reinsurer - Universal Life

Start date	Closed to new applications after	Reinsurer and Pool %	Retention and automatic binding limit per life

Third Party Reinsurer - Excess Facultative

Start date	Closed to new applications after	Reinsurer	Retention per life
May 11, 2006	May 31, 2007	Swiss Re SG	Subject to maximum limit of retention by risk class
July 1, 2008	November 30, 2008	Munich Re SG	Subject to maximum limit of retention by risk class
January 31, 2014	December 31, 2014	Swiss Re HK	Subject to maximum limit of retention by risk class
January 31, 2014	Still effective	RGA HK	Subject to maximum limit of retention by risk class

(o) Summary of the material reinsurance arrangements effected by the insurer; (continued)

Blue Square Re N.V.

BSRe is an affiliated reinsurance company within AEGON Group. The arrangement of the BSRe treaties is first dollar quota share on YRT basis, with reinsurer assuming 50% on certain universal life policies' total amount retained by TLB after third party reinsurance ("TPR"). Reinsurance premium rates, covered policies scope such as underwriting class, issue age limit are stated in the appendix of the treaties. The products covered in this treaty are universal life and term life.

Start date	Closed to new applications after	Reinsurer	Retention per single life
January 1, 2013	Still effective	BSRe	50% after TPR
January 1, 2015	Still effective	BSRe	50% after TPR
April 1, 2017	Still effective	BSRe	50% after TPR

TLIC Coinsurance

The below three treaties are on coinsurance basis. Transamerica Occidental Life Insurance Company ("TOLIC") and Transamerica Life Insurance Company ("TLIC") were affiliated companies within AEGON Group and merged on 1 October 2008. Hence the first treaty in the table below was transferred from TOLIC to TLIC on that day.

Start date	Closed to new applications after	Reinsurer	% ceded
December 31, 2006	Still effective	TLIC	100%
August 1, 2011	Still effective	TLIC	80% before 1 Jan 2017 and become 100% after that
January 1, 2013	Still effective	TLIC	100%

TLIC Stop Loss

This treaty is an aggregate stop loss treaty, during each coverage period, the reinsurer will reimburse the Ceding Company for any Excess Losses on all products with death benefit. Reinsurance premium rate and deductible calculations are stated in the appendix of the treaty. It is originally written with TOLIC, and then transferred to TLIC at 1 October 2008 when two companies merged.

Start date	Closed to new applications after	Reinsurer	Aggregate deductible
April 1, 2006	Still effective	TLIC	Expected death benefit plus one standard deviation

(p) Particulars of any other matters, including events after the reporting date, so far as they are material for the appreciation of the state of the insurer's affairs.

There were no events that had a material effect on the state of affairs of the insurer as of the reporting date.

(q) Auditors

At an annual general meeting of the Company on September 26, 2018, it was resolved that PricewaterhouseCoopers be appointed as auditors of the Company to commence the preparation of the 2018 audit and to hold office until the close of the next annual general meeting of the Company.

ON BEHALF OF THE BOARD

Marc R. Lieberman
Chief Executive Officer
Transamerica Life (Bermuda) Ltd.
April 26, 2019

INDEPENDENT AUDITOR'S REPORT
TO THE BOARD OF DIRECTORS OF TRANSAMERICA LIFE (BERMUDA) LTD.

Opinion

What we have audited

The financial statements of Transamerica Life (Bermuda) Ltd. (the "Company") set out on pages 15 to 73, which comprise:

- the statement of financial position as at December 31, 2018;
- the statement of profit or loss and other comprehensive income for the year then ended;
- the statement of changes to shareholder's equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Our opinion

In our opinion, the financial statements give a true and fair view of the financial position of the Company as at December 31, 2018, and of its financial performance and its cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and the International Financial Reporting Standards ("IFRSs") issued by the International Accounting Standards Board ("IASB").

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the Directors' report and the Financial Information prepared under the Hong Kong Insurance Ordinance, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

Other Information (continued)

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Directors and Those Charged with Governance for the Financial Statements

The directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA, IFRSs issued by the IASB, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, in accordance with Section 90 of the Companies Act 1981 of Bermuda and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Auditor's Responsibilities for the Audit of the Financial Statements (Continued)

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

1. CORPORATE INFORMATION

The registered office of Transamerica Life ("Bermuda") Ltd. (the "Company") is located at 44 Church Street, Hamilton, Bermuda.

The Company is a stock life insurance company incorporated under the laws of Bermuda on May 27, 2005. The Company is a wholly owned subsidiary of AEGON N.V. through Transamerica Life Insurance Company ("TLIC") and AEGON International B.V. ("AIBV"). TLIC is incorporated in the state of Iowa, USA, and is an indirect wholly owned subsidiary of AIBV. AIBV is a wholly owned subsidiary of AEGON N.V., a holding company recognized under the laws of The Netherlands which is the Company's ultimate holding company.

The Company's resident manager and principal representative in Bermuda is Marsh IAS Management Services (Bermuda) Ltd. The Company is a registered insurer under The Insurance Act 1978, related regulations, and amendments thereto (the "Act").

The Company provides life insurance, annuity, personal accident and hospital indemnity coverages, which are distributed through a network of independent agents, brokers, financial advisors and telemarketers. The Company's products are primarily distributed in Hong Kong and Singapore. The Company is involved in ceding business to affiliated and unaffiliated companies.

2.1. BASIS OF PREPARATION

The financial statements has been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRS") (which include all HKFRS, Hong Kong Accounting Standards ("HKAS") and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), International Financial Reporting Standards ("IFRS") (which includes all IFRS, International Accounting Standards ("IAS") and Interpretations) issued by the International Accounting Standards Board ("IASB"). The financial information has been prepared in accordance with the requirements of the Hong Kong Insurance Ordinance.

They have been prepared under the historical cost convention, except for available-for-sale financial investments, held to maturity, and financial assets at fair value through profit or loss as disclosed in notes 9 and 11, which have been measured at fair value. The financial statements are presented in United States dollars and all values are rounded to the nearest thousand except when otherwise indicated.

The Company has been managed on the basis that the entire operations constitute the fund referred to in Section 22 of the Hong Kong Insurance Ordinance and accordingly, the revenue account prepared in conformity with the third schedule of the Hong Kong Insurance Ordinance has been disclosed on that basis. Effective with the Statement of Financial Position as at December 31, 2013, the Company has prospectively from December 31, 2013 segregated its long-term business and other-than long term business (shareholders' fund) as set out in the statement of financial position in conformity with requirements under Hong Kong Insurance Ordinance, consistent with Section 22 of the Hong Kong Insurance Ordinance.

2.2. CHANGES IN ACCOUNTING POLICY AND DISCLOSURES

Standards, amendments and interpretations implemented for the financial year beginning on or after January 1, 2018 are not material to the Company.

2.3. NEW STANDARDS AND INTERPRETATIONS NOT YET ADOPTED

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning on or after January 1, 2018 and have not been adopted in preparing these financial statements. None of these are expected to have a significant effect on the financial statements, except the following set out below:

IFRS/HKFRS 9, 'Financial instruments', addresses the classification, measurement and recognition of financial assets and financial liabilities. The standard is effective for accounting periods beginning on or after January 1, 2018. Early adoption is permitted. On 12 September 2016, the IASB issued amendments to IFRS 4, Insurance Contracts, Applying IFRS/HKFRS 9 Financial Instruments with IFRS 4, which provides two alternative measures to address the different effective dates of IFRS/HKFRS 9 and the forthcoming insurance contracts standard. These measures include a temporary option for companies whose activities are predominantly connected with insurance to defer the effective date of IFRS/HKFRS 9 until the earlier of the effective date of the forthcoming insurance contracts standard and the financial reporting periods beginning on or after January 1, 2022, as well as an approach that allows an entity to remove from profit or loss the effects of certain accounting mismatches that may occur before the forthcoming insurance contracts standard is applied. Based on the amendments to IFRS 4, the insurance contracts within the scope of IFRS 4 give rise to liabilities whose carrying amount is significant compared to the total carrying amount of liabilities. The Company is eligible for and will elect to apply the temporary option to defer the effective date of IFRS 9.The future impact for IFRS/HKFRS 9 has been considered as follows.

The complete version of IFRS/HKFRS 9 was issued in July 2014. It replaces the guidance in IAS/HKAS 39 that relates to the classification and measurement of financial instruments. IFRS/HKFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through OCI and fair value through P&L. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in OCI not recycling. There is now a new expected credit losses model that replaces the incurred loss impairment model used in IAS/HKAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. IFRS/HKFRS 9 relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and hedging instrument and for the 'hedged ratio' to be the same as the one management actually use for risk management purposes.

2.3. NEW STANDARDS AND INTERPRETATIONS NOT YET ADOPTED (CONTINUED)

Contemporaneous documentation is still required but is different to that currently prepared under IAS/HKAS 39. The Company is yet to assess IFRS/HKFRS 9's full impact, however an initial impact assessment resulted in the expectation that it will not have a significant impact on shareholders' equity, profit/loss and/or other comprehensive income and disclosures.

	Fair value as at December 31, 2018	Fair value change for the year ended December 31, 2018

	Carrying amount	**Fair value**
	US$'000	**US$'000**
Financial assets that do not have low credit risk	14,573	12,002

2.3. NEW STANDARDS AND INTERPRETATIONS NOT YET ADOPTED (CONTINUED)

There are no other IFRSs/HKFRSs or IFRIC/HK (IFRIC) interpretations that are not yet effective that would be expected to have a material impact to the group except for IFRS 17.

IFRS 17 is effective for annual periods beginning on or after January 1, 2022. The Standard represents a fundamental change to current financial reporting and the implementation effort is expected to be significant. Early adoption of the standard is therefore not expected. An implementation project was started soon after the publication of the new Standard.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Product classification

The Company issues contracts that transfer insurance risk and/or financial risk.

Insurance contracts are those contracts for which the Company has accepted significant insurance risk from policyholders providing coverage for death, accident, and sickness at the inception of the contract. As a general guideline, the Company determines whether it has significant insurance risk by comparing benefits paid with benefits payable if the insured event did not occur. The Company also accepts financial risk on insurance contracts. Financial risk is the risk of a possible future change in interest rate, security price, commodity price, foreign exchange rate, index of price or rate, credit rating or credit index, or other variables.

Foreign currencies

The Company's functional currency is United States dollars. Foreign currency transactions are initially recorded using the functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognized in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change on fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognized in other comprehensive income or profit or loss is also recognized in other comprehensive income or profit or loss, respectively).

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than financial assets), the asset's recoverable amount is estimated. An asset's recoverable amount is calculated as the higher of the asset's or cash-generating unit's value in use and its fair value less costs to sell, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is recognized only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired assets.

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss of an asset other than goodwill and certain financial assets is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/recognized) had no impairment loss been recognized for the asset in prior years. A reversal of such impairment loss is credited to profit or loss in the period in which it arises.

Related parties

A party is considered to be related to the Company if:

(a) the party is a person or a close member of that person's family and that person,

  (i) has control or joint control over the Company;

  (ii) has significant influence over the Company; or

  (iii) is a member of the key management personnel of the group or of a parent of the Company; or

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(b) the party is an entity where any of the following conditions applies;

(i) the entity and the Company are members of the same group;

(ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);

(iii) the entity and the Company are joint ventures of the same third party;

(iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) the entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company;

(vi) the entity is controlled or jointly controlled by a person identified in (a); and

(vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

Investments and other financial assets

Initial recognition and measurement

Financial assets within the scope of IAS/HKAS 39 are classified as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial investments, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Company determines the classification of its financial assets at initial recognition. When financial assets are recognized initially, they are measured at fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset.

All regular way purchases and sales of financial assets are recognized on the trade date, that is, the date that the Company commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

The Company's financial assets include cash and cash equivalents, financial assets at fair value through profit or loss, available-for-sale financial investments, held-to-maturity investments and other fixed-interest securities in the form of loans secured on life insurance policies (note 10), which are classified as loans and receivables.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are non-derivative financial assets in listed and unlisted debt securities with fixed or determinable payments and fixed maturities that the Company holds for trading or designates upon initial recognition as at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of sale in the near term.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with positive net changes in fair value presented as investment income and gains and negative net changes in fair value presented as finance costs in profit or loss. These net fair value changes do not include any dividends or interest earned on these financial assets, which are recognized in accordance with the policies set out for "Investment income" below.

Financial assets designated upon initial recognition at fair value through profit or loss are designated at the date of initial recognition and only if the criteria under IAS/HKAS 39 are satisfied.

The Company evaluates its financial assets at fair value through profit or loss (held for trading) to assess whether the intent to sell them in the near term is still appropriate. When, in rare circumstances, the Company is unable to trade these financial assets due to inactive markets and management's intent to sell them in the foreseeable future significantly changes, the Company may elect to reclassify them. The reclassification from financial assets at fair value through profit or loss to loans and receivables, available-for-sale financial assets or held-to-maturity investments depends on the nature of the assets. This evaluation does not affect any financial assets designated at fair value through profit or loss using the fair value option at designation, as these instruments cannot be reclassified after initial recognition.

Investments and other financial assets (continued)

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and comprise loans, receivable for securities, premiums deferred and uncollected - direct less commission, insurance receivables, and receivable from related companies on the statement of financial position. After initial measurement, such assets are subsequently measured at amortised cost using the effective interest rate method less any allowance for impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and includes fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in investment income and gains in profit or loss. The loss arising from impairment is recognized in profit or loss in operating expenses.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Held-to-maturity financial assets

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. Subsequent to initial measurement, held-to-maturity financial assets are measured at amortised cost using the effective interest method less impairment, with revenue recognized on an effective yield basis. If the Company were to sell other than an insignificant amount of held-to-maturity financial assets, the whole category would be tainted and reclassified as available for sale.

On October 1, 2018, the Company reclassified approximately 193 securities with a fair value of US$609,285,000 out of available-for-sale and into held-to-maturity. The fair value at the time of the reclassification became the new amortised cost of these securities and any unrealised gain or loss is amortised over the remaining lives of the securities in accordance with the effective interest method.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets in listed and unlisted equity investments and debt securities. Equity investments classified as available-for-sale are those which are neither classified as held for trading nor designated at fair value through profit or loss. Debt securities in this category are those which are intended to be held for an indefinite period of time and which may be sold in response to needs for liquidity or in response to changes in the market conditions.

After initial recognition, available-for-sale financial assets are subsequently measured at fair value, with unrealised gains or losses recognized as other comprehensive income in the available-for-sale investment revaluation reserve until the investment is derecognized, at which time the cumulative gain or loss is recognized in profit or loss in other income, or until the investment is determined to be impaired, when the cumulative gain or loss is reclassified from the available-for-sale investment revaluation reserve to profit or loss in other expenses. Interest and dividends earned while holding the available-for-sale financial investments are reported as interest income and dividend income, respectively and are recognized in profit or loss as investment income in accordance with the policies set out for "Investment income" below.

When the fair value of unlisted equity investments cannot be reliably measured because (a) the variability in the range of reasonable fair value estimates is significant for that investment or (b) the probabilities of the various estimates within the range cannot be reasonably assessed and used in estimating fair value, such investments are stated at cost less any impairment losses.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The Company evaluates whether the ability and intention to sell its available-for-sale financial assets in the near term is still appropriate. When, in rare circumstances, the Company is unable to trade these financial assets due to inactive markets and management's intent to do so in the foreseeable future significantly changes, the Company may elect to reclassify these financial assets. Reclassification to loans and receivables is permitted when the financial assets meet the definition of loans and receivables and the Company has the intent and ability to hold these assets for the foreseeable future or to maturity. Reclassification to the held-to-maturity category is permitted only when the Company has the ability and intent to hold until the maturity date of the financial asset.

For a financial asset reclassified from the available-for-sale category, the fair value carrying amount at the date of reclassification becomes its new amortised cost and any previous gain or loss on that asset that has been recognized in equity is amortised to profit or loss over the remaining life of the investment using the effective interest rate. Any difference between the new amortised cost and the maturity amount is also amortised over the remaining life of the asset using the effective interest rate. If the asset is subsequently determined to be impaired, then the amount recorded in equity is reclassified to profit or loss.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired; or

- the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement and either (a) the Company has transferred substantially all the risks and rewards of the asset or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Company's continuing involvement in the asset. In that case, the Company also recognized an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of financial assets

The Company assesses at the end of each reporting period whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (an incurred loss event) and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that a debtor or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Investments and other financial assets

Available-for-sale financial investments

For available-for-sale financial investments, the Company assesses at the end of each reporting period whether there is objective evidence that an investment or a group of investments is impaired.

If an available-for-sale asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortisation) and its current fair value, less any impairment loss previously recognised in profit or loss, is removed from other comprehensive income and recognised in profit or loss.

In the case of equity investments classified as available for sale, objective evidence would include a significant or prolonged decline in the fair value of an investment below its cost. The determination of what is "significant" or "prolonged" requires judgement. "Significant" is evaluated against the original cost of the investment and "prolonged" against the period in which the fair value has been below its original cost. Significant or prolonged decline is defined by the Company as an unrealised loss position for generally more than six months or a fair value of less than 80% of the cost price of the investment. Where there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in profit or loss – is removed from other comprehensive income and recognised in profit or loss. Impairment losses on equity instruments classified as available for sale are not reversed through profit or loss. Increases in their fair value after impairment are recognised directly in other comprehensive income.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

In the case of debt instruments classified as available for sale, impairment is assessed based on the same criteria as financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in profit or loss. Future interest income continues to be accrued based on the reduced carrying amount of the asset and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income. Impairment losses on debt instruments are reversed through profit or loss if the increase in fair value of the instruments can be objectively related to an event occurring after the impairment loss was recognised in profit or loss.

Financial liabilities

Initial recognition and measurement

Financial liabilities within the scope of IAS/HKAS 39 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Company determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Loans and borrowings

The Company's loans and borrowings include premium deposits, advance premium, claims payable, accrued expenses and other creditors.

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of the discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in profit or loss.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged, cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference between the respective carrying amounts is recognized in profit or loss.

Premiums receivable

Premiums receivable are included in premiums deferred and uncollected in the statement of financial position. Premiums receivable represent premiums which are due for payment. The Company normally allows policyholders to make payment within a grace period of one month from the due date. The grace period may be extended by one further month by management purely on a discretionary basis. Insurance policies continue in force if default premiums are settled before the expiry of the grace period.

Cash and cash equivalents

For the purpose of the statement of financial position, cash and cash equivalents comprise cash at bank and on hand and short-term deposits with an original maturity of three months or less.

For the purpose of the statement of cash flows, cash and cash equivalents comprise cash on hand, demand deposits and short-term highly liquid investments which are readily convertible into known amounts of cash, are subject to an insignificant risk of changes in value, and have a short maturity of generally within three months when acquired, less bank overdrafts which are repayable on demand and form an integral part of the Company's cash management.

Money market investments that are held for investment purposes (backing insurance liabilities, investment liabilities or equity based on asset liability management considerations) are not included in cash and cash equivalents but are presented as investments.

Provisions

A provision is recognized when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the effect off discounting is material, the amount recognized for a provision is the present value at the reporting date of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in profit or loss.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Dividends

Final dividends proposed by the directors are classified as a separate allocation of retained profits within the equity section of the statement of financial position, until they have been approved by the shareholders in a general meeting. When these dividends have been approved by the shareholders and declared, they are recognized as a liability.

Interim dividends are simultaneously proposed and declared, because the Company's memorandum and articles of association grant the directors the authority to declare interim dividends. Consequently, interim dividends are recognized immediately as a liability when they are proposed and declared.

Insurance contract liabilities

Insurance contract liabilities represent net future policy liabilities as determined by the appointed actuary of the Company using a net level premium approach for traditional policies.

The provision for life insurance contracts with fixed-level premiums is calculated on the basis of the prudent prospective actuarial valuation method where the assumptions used depend on the circumstances prevailing. The liability is determined as the sum of the expected discounted value of the benefit payments, less the expected discounted value of the theoretical premiums that would be required to meet the benefits, based on the valuation assumptions as to mortality and investment income that are established at the time the contract is issued, plus a margin for adverse deviation. Provision for life insurance contracts with flexible premiums for non-coinsured non-secondary guarantee products is calculated as the cash surrender value plus the greater of unearned cost of insurance ("COI") and sterling reserve. The provision for the other life insurance contracts with flexible premiums is calculated as a percentage of account value, as determined by the appointed actuary that provides a prudent provision for the discounted value of future benefit payments. Changes to the liabilities at each reporting date are recorded in profit or loss as an expense. The liabilities on yearly renewable premium contracts are the liabilities for the unexpired risks carried at the reporting date. The liability is derecognised when the contract expires, is discharged, or is cancelled.

A liability adequacy test is performed on an annual basis to verify whether the insurance liabilities are adequate using current estimates of future cash flows under the insurance contracts. The liability value is adjusted if insufficient to meet future obligations, taking into account future premiums, investment income, benefits and expenses and cash flows from embedded options, and guarantees. If the test shows that a deficiency exists, the shortfall is immediately recorded in profit or loss.

A resilience test is performed on annual basis to provide allowance for the movement of market value of required assets relative to value of liability such that negative surplus is avoided under shocked interest rate scenarios.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Reinsurance

The Company cedes insurance risk in the normal course of business for its insurance contracts. Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with the insurance contract liabilities, are settled in accordance with the reinsurance contract and are accounted for in the same period as the underlying claim.

Premiums and claims are presented on a gross basis for ceded reinsurance. Reinsurance assets or liabilities are derecognized when the contractual rights are extinguished or expire or when the contract is transferred to another party. Reinsurance assets are reviewed for impairment at each reporting date, or more frequently, when an indication of impairment arises during the reporting year. Impairment occurs when objective evidence exists that the Company may not receive all outstanding amounts due under the terms of the contract and the event has a reliably measurable impact on the amounts that the Company will receive from the reinsurer. The impairment loss is recorded in profit or loss.

Ceded reinsurance arrangements do not relieve the Company from its obligations to policyholders.

Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognized outside profit or loss is recognized outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Company operates.

Deferred tax assets and liabilities

Deferred tax assets and liabilities are recognized for the estimated future tax effects of temporary differences between the carrying value of an item and its tax value, with the exception of assets and liabilities that do not impact taxable or accounting profits. A tax asset is recognized for tax loss carryforwards to the extent that it is probable at the reporting date that future taxable profits will be available against which the unused tax losses and unused tax credits can be utilised.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Deferred tax assets and liabilities (continued)

Deferred tax assets and liabilities are reviewed at the balance sheet date and are measured at tax rates that are expected to apply when the asset is realised or the liability is settled. The carrying amount is not discounted and reflects the Company's expectations concerning the manner of recovery or settlement.

Deferred tax assets and liabilities are recognized in relation to the underlying transaction either in profit and loss, other comprehensive income or directly in equity.

Premiums

Premiums in respect of traditional policies are recognized as income as and when they fall due, whereas those in respect of universal life and unit-linked contracts are accounted for as they are received. Premiums on reinsured policies that transfer underwriting risk are expensed as incurred.

Commissions

Commissions received on reinsured policies that transfer underwriting risk are recognized as income at the same time as the reinsurance premiums are recognized. Commission expense are expensed as incurred.

Realised gains and losses on investments

Realised gains and losses on investments are determined as the difference between the net sales proceeds and cost or amortised cost.

Investment income

Investment income is recognized on an accrual basis using the effective interest rate method by applying the rate that discounts the estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

Dividend income

Dividend income is recognized when the shareholders' right to receive payment is established. For listed securities, this is the date the security is listed as ex-dividend.

Benefits and insurance claims

Death claims and surrenders are recorded when notifications have been received. Maturities and annuity payments are recorded when due. Benefits recorded are then accrued to the liability.

Ceded reinsurance recoveries are accounted for in the same period as the underlying claim.

3.1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Events after the reporting date

The financial statements are adjusted to reflect events that occurred between the reporting date and the date when the financial statements are authorised for issue, provided they give evidence of conditions that existed at the reporting date. Events that are indicative of conditions that arose after the reporting date are disclosed, but do not result in an adjustment of the financial statements.

Fair value measurement

The Company measures certain investments at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Assets and liabilities recorded at fair value on the Statement of Financial Position are categorised as follows:

Level 1. Unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2. Quoted prices in markets that are not active or inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:

a) Quoted prices for similar assets or liabilities in active markets

b) Quoted prices for identical or similar assets or liabilities in non-active markets

c) Inputs other than quoted market prices that are observable

d) Inputs that are derived principally from or corroborated by observable market data through correlation or other means

Level 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Both observable and unobservable inputs may be used to determine the fair value of positions classified in Level 3. The circumstances for using unobservable measurement include those in which there is little, if any, market activity for the assets or liabilities. Therefore, the Company must make assumptions about inputs that a hypothetical market participant would use to value the assets and liabilities.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

3.2. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The Company makes estimates, assumptions and judgments that affect the reported amounts of assets and liabilities. Estimates, assumptions and judgments are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are described below.

Life insurance contract liabilities

The estimation of the ultimate liabilities arising from claims made under life insurance contracts is the Company's most critical accounting estimate. There are sources of uncertainty that need to be considered in the estimation of the liabilities that the Company will ultimately pay for those claims.

Two major components in the estimation of the liabilities for insurance contracts are death benefits and investment returns. Estimates are made as to the expected number of deaths for each of the years in which the Company is exposed to risk. The Company bases these estimates on standard industry and national mortality tables that reflect historical mortality experience, adjusted, where appropriate, to reflect the Company's unique risk exposure. The estimated number of deaths determines the value of possible future benefits to be paid out which will be factored into ensuring sufficient cover by provisions, which in return is monitored against the current and future premiums.

Investment returns are based on the investment strategy of the Company with due regard to the expected return on assets backing the insurance contracts.

Estimates for future deaths and investment returns are determined at the inception of the contract and are used to calculate the liability over the term of the contract. At each reporting date, these estimates are reassessed for adequacy, and changes will be reflected in adjustments to the liability.

The carrying value of the Company's life insurance contract liabilities (including claims payable and premium deposits) at December 31, 2018 and 2017 is US$8,025,693,000 and US$7,553,145,000 respectively.

3.2. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (CONTINUED)

Fair value of financial assets

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair values of fixed-interest securities are determined by management after taking into consideration several sources of data. When available, the Company uses quoted market prices in active markets to determine the fair value of its fixed-interest securities. The Company's valuation policy utilises a pricing hierarchy which dictates that publicly available prices are initially sought from indices and third-party pricing services. In the event that pricing is not available from these sources, those securities are submitted to brokers to obtain quotes. The majority of brokers' quotes are non-binding. As part of the pricing process, the Company assesses the appropriateness of each quote (i.e., as to whether the quote is based on observable market transactions or not) to determine the most appropriate estimate of fair value. Lastly, securities are priced using internal cash flow modeling techniques. These valuation methodologies commonly use the following inputs: reported trades, bids, offers, issuer spreads, benchmark yields, estimated prepayment speeds, and/or estimated cash flows.

To understand the valuation methodologies used by third-party pricing services, the Company reviews and monitors their applicable methodology documents. Any changes to their methodologies are noted and reviewed for reasonableness.

In addition, the Company performs in-depth reviews of prices received from third-party pricing services on a sample basis. The objective for such reviews is to demonstrate that the Company can corroborate detailed information such as assumptions, inputs and methodologies used in pricing individual securities against documented pricing methodologies. Only third-party pricing services and brokers with a substantial presence in the market and with appropriate experience and expertise are used.

Periodically, the Company performs an analysis of the inputs obtained from third-party pricing services and brokers to ensure that the inputs are reasonable and produce a reasonable estimate of fair value. The Company's asset specialists and investment valuation specialists consider both qualitative and quantitative factors as part of this analysis. Several examples of analytical procedures performed include, but are not limited to, recent transactional activity for similar debt securities, review of pricing statistics and trends and consideration of recent relevant market events. Other controls and procedures over pricing received from indices, third-party pricing services, or brokers include validation checks such as exception reports which highlight significant price changes, stale prices or un-priced securities.

3.2. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (CONTINUED)

Fair value of financial assets (continued)

The Company's portfolio of private placement securities (held at fair value under the classification of available-for-sale) is valued using a matrix pricing methodology. The pricing matrix is obtained from a third-party service provider and indicates current spreads for securities based on weighted average life, credit rating, and industry sector. Each month, the Company's asset specialists review the matrix to ensure the spreads are reasonable by comparing them to observed spreads for similar bonds traded in the market. Other inputs to the valuation include coupon rate, the current interest rate curve used for discounting and an illiquidity premium to account for the illiquid nature of these securities. The illiquidity premiums are determined based upon the pricing of recent transactions in the private placements market; comparing the value of the privately offered security to a similar public security. The impact of the illiquidity premium for private placement securities to the overall valuation is insignificant.

The Company's listed financial assets at fair value through profit or loss and available-for-sale financial investments carried at fair value at December 31, 2018 and 2017 is US$2,233,681,000 and US$2,365,835,000 respectively. The Company's listed held-to-maturity assets held at amortised costs at December 31, 2018 and 2017 is US$4,491,971,000 and US$4,047,942,000 respectively.

4. REVENUE, INVESTMENT INCOME, NET GAINS AND OTHER INCOME

Revenue, which is also the Company's turnover, represents net premiums on insurance contracts. An analysis of turnover and investment income is as follows:

	2018	2017
	US$'000	US$'000
Turnover		
Life insurance contracts:		
Single premiums	**500,773**	723,300
Regular premiums	**131,599**	146,840
Gross premiums	**632,372**	870,140
Reinsurers' share	**(55,970)**	(267,962)
Net premiums	**576,402**	602,178
Investment income		
Interest income from quoted fixed-interest securities	**260,270**	236,660
Interest income from banks	**77**	34
Interest received from policy loans	**1,023**	482
Investment handling charges (note 26 (ii))	**(7,245)**	(6,383)
Other	**(317)**	(25)
Net investment income	**253,808**	230,768
Realised gains/(losses)		
Gains on sale of securities	**2,585**	5,782
Losses on sale of securities	**(22,092)**	(4,112)
Net realised gains	**(19,507)**	1,670
Fair value gains/(losses)		
Fair value gains/(losses) on financial assets at fair value through profit or loss (held for trading purposes)	**(2,104)**	1,929

5. FINANCE COSTS

	2018	2017
	US$'000	US$'000
Interest expense on intercompany funding	**46**	46
Interest expense on coinsurance settlement	**-**	1,000
Total finance costs	**46**	1,046

6. OPERATING EXPENSES

	Notes	2018	2017
		US$'000	US$'000
Employee benefits and expenses:			
Salaries and benefits		**21,150**	17,283
Pension costs	23	**996**	765
		22,146	18,048
Office expenses		**10,366**	8,142
Management fee paid to parent company	26	**4,515**	4,618
Management fee paid to affiliates	26	**4,431**	6,248
Other general expenses		**2,713**	2,393
Auditors' remuneration		**611**	460
Total operating expenses		**44,782**	39,909

7. DIRECTORS' AND KEY MANAGEMENT'S REMUNERATION

Director fees or endowments in the amount of US$4,500 were paid during 2018 (2017: US$6,000).

Other remuneration of key management personnel is paid by and recorded in the financial statements of a related company. A recharge of expenses is made to the Company as explained in note 26 (v).

8. TAX

Hong Kong profits tax has been provided at the rate of 16.5% (2017: 16.5%) on the estimated assessable profits arising in Hong Kong during the year.

The assessable profits of the Company subject to Hong Kong profits tax are computed in accordance with the special provisions of the Hong Kong Inland Revenue Ordinance. Tax for the life insurance business, as defined by the Hong Kong Inland Revenue Ordinance, is computed at a rate of 16.5% of 5% of net premium (gross premium received less reinsurance premium ceded) of the life insurance business, in accordance with Section 23(1)(a) of the Hong Kong Inland Revenue Ordinance.

The Company has a profit before tax of US$83,460,000 in 2018 (2017: profit before tax of US$400,168,000). The gross premiums received are US$632,372,000 (2017: US$870,140,000) and US$55,970,000 (2017: US$267,962,000) of reinsurance premiums were ceded. The gross premiums received from Hong Kong business are US$427,183,000 (2017: US$611,271,000) and US$39,248,000 (2017: US$222,911,000) of reinsurance premiums ceded.

Singapore income tax has been provided at the rate of 10% to 17% (2017: 10% to 17%) on the estimated chargeable income arising from the Company's Singapore operation during the year. The relevant chargeable income in 2018 is US$6,893,000 (2017: US$213,949,000). The Company has no tax losses carried forward from prior years.

	2018	2017
	US$'000	US$'000
Current – Hong Kong:		
Charge for the year	**3,279**	3,805
(Over)/Under provision in prior year	**(257)**	-
Current – Singapore:		
Charge for the year	**27,844**	29,949
(Over)/Under provision in prior year	**698**	-
Deferred – Singapore:		
Charge for the year	**(22,563)**	(4,674)
Tax charge for the year	**9,001**	29,080

8. TAX (CONTINUED)

A reconciliation of the tax expense applicable to profit before tax at the statutory rate to the tax expense at the effective tax rate is as follows:

	2018	2017
	US$'000	US$'000
Profit before tax	**83,460**	400,168
Tax expense at the statutory tax rate of 16.5%	**13,771**	66,028
Tax at 16.5% of 5% of net premium of the insurance business in Hong Kong	**3,279**	3,805
Hong Kong tax for prior periods	**(257)**	-
Results of life insurance business not deductible/(taxable) at Hong Kong statutory rate	**(13,771)**	(66,028)
Taxes related to other countries	**5,889**	25,194
Others	**90**	81
Tax charge for the year	**9,001**	29,080

At December 31, 2018 the Company had income tax payable of US$28,406,000 (2017: payable of US$30,980,000).

8. TAX (CONTINUED)

Deferred Tax

The movements in deferred tax liabilities and assets during the year are as follows:

Deferred tax liabilities

	2018 Profit and Loss	2018 Fair value adjustments arising from available for sale securities	2018 Total deferred tax liabilities	2017 Total deferred tax liabilities
	US$'000	US$'000	US$'000	US$'000
At January 1	–	20,126	20,126	18,111
Deferred tax charged during the year	–	(6,075)	(6,075)	2,015
Gross deferred tax liabilities at December 31	–	14,051	14,051	20,126

Deferred tax assets

	2018 Profit and Loss	2018 Fair value adjustments arising from available for sale securities	2018 Total deferred tax assets	2017 Total deferred tax assets
	US$'000	US$'000	US$'000	US$'000
At January1	16,983	1,090	18,073	14,453
Deferred tax (charged)/credited during the year	22,564	5,320	27,884	3,620
Gross deferred tax assets at December 31	39,547	6,410	45,957	18,073

8. TAX (CONTINUED)

Deferred Tax (continued)

For presentation purposes, certain deferred tax assets and liabilities have been offset in the statement of financial position. The following is an analysis of the deferred tax balances for financial reporting purposes:

	2018	2017
	US$'000	US$'000
Deferred tax assets	**45,957**	18,073
Deferred tax liabilities	**(14,051)**	(20,126)
Total net deferred tax assets (liabilities)	**31,906**	(2,053)

Deferred tax assets computed on deductible temporary differences of:	**2018**	2017
	US$'000	US$'000
Insurance reserves	**273,571**	114,825
Financial assets	**44,502**	8,069
Total deductible temporary differences	**318,073**	122,894

Deferred tax liabilities computed on taxable temporary differences of:		
Financial assets	**102,787**	147,904
Total taxable temporary differences	**215,286**	(25,010)

Deferred corporate income tax assets in respect of deductible temporary differences are recognized to the extent that the realization of the related tax benefit through future taxable profits is probable. For the above amounts the recognition of the deferred corporate income tax asset is dependent on future taxable profits in excess of the profits arising from the reversal of existing taxable temporary differences.

All deferred taxes are non-current by nature.

9. FIXED-INTEREST SECURITIES AND OTHER INTEREST BEARING ASSETS

	Notes	2018 US$'000	2017 US$'000
Total financial investments:			
Policy loans	10	**13,098**	6,849
Held-to-maturity financial investments		**4,491,971**	4,047,942
Available-for-sale financial investments	11	**2,213,069**	2,340,693
Financial assets at fair value through profit or loss		**20,612**	25,142
		6,738,750	6,420,626
Current portion:			
Held-to-maturity financial investments		**69,637**	32,120
Available-for-sale financial investments	11	**232,125**	161,905
		301,762	194,025
Non-current portion:			
Policy loans	10	**13,098**	6,849
Held to maturity financial investments		**4,422,334**	4,015,822
Available-for-sale financial investments	11	**1,980,944**	2,178,788
Financial assets at fair value through profit or loss		**20,612**	25,142
		6,436,988	6,226,601
		6,738,750	6,420,626

On October 1, 2018, the Company reclassified approximately 193 securities with a fair value of US$609,285,000 out of available-for-sale and into held-to-maturity. The fair value at the time of the reclassification became the new amortized cost of these securities and any unrealized gain or loss is amortized over the remaining lives of the securities in accordance with the effective interest method. As at date of reclassification, the effective interest rate on securities reclassified into held-to-maturity ranged from 3.1% to 7.1%, with expected recoverable cash flows of US$ 6,685,277 in 2018.

As at December 31, 2018, the fair value of held-to-maturity financial investments is US$4,258,702,000 (Note 14). Fair value gains of US$53,169,000 would have been recognized in the profit or loss or other comprehensive income if the securities had not been reclassified.

The following table shows detail about the securities held to maturity reclassified:

	2018 US$'000
As at December 31:	
Carrying amount	**602,668**
Fair value	**589,997**

9. FIXED-INTEREST SECURITIES AND OTHER INTEREST BEARING ASSETS (CONTINUED)

If the securities had not been reclassified as held-to-maturity, the total amount recognized in profit or loss would have been as follows:

	2018 US$'000
Profit for the year	**74,459**
Other comprehensive income	
Other comprehensive income to be reclassified to profit or loss in subsequent periods:	
Held to Maturity financial assets	
Reclassification adjustment for amortization	**(23,637)**
Available-for-sale financial assets	
Changes in fair value	**(169,099)**
Reclassification adjustment for loss included in profit or loss	**12,228**
Income tax effect	**12,277**
Exchange fluctuation reserve	**208**
Total comprehensive income for the year	**(93,564)**

As at December 31, 2017, the fair value of held-to-maturity financial investments is US$4,021,314,000. Fair value gains of US$202,127,000 would have been recognized in the profit or loss or other comprehensive income if the securities had not been reclassified.

10. POLICY LOANS

The policy loans are made to policyholders and are secured by the policies' cash surrender value. Policy loans are repayable at the discretion of the policyholders as long as the interest plus the principal of the loans does not equal or exceed the cash value or until the policy matures. The policy loans are interest-bearing at a rate between 4.8% and 7.4% per annum for 2018 and 2017 depending on the policy. The carrying amounts reasonably approximate to their fair values at the reporting date.

11. AVAILABLE-FOR-SALE FINANCIAL INVESTMENTS

	Notes	**2018** **US$'000**	2017 US$'000
Quoted fixed-interest securities, at fair value:			
Hong Kong		**10,272**	8,221
Elsewhere		**2,008,610**	2,248,665
		2,018,882	2,256,886
Other listed financial investments:			
Hong Kong		**–**	–
Elsewhere		**194,187**	83,807
	(i)	**194,187**	83,807
Total available-for-sale financial investments	9	**2,213,069**	2,340,693
Current portion		**232,125**	161,905
Non-current portion		**1,980,944**	2,178,788
	9	**2,213,069**	2,340,693

(i) Other listed financial investments mainly represent hybrid securities, common stock, and beneficial interest in transit with no fixed maturity date.

The available-for-sale financial investments included in the statement of financial position analysed by category of issuer as at the reporting date were as follows:

	Note	**2018** **US$'000**	2017 US$'000
Governments or public authorities		**417,641**	449,854
Banks and other financial institutions		**489,525**	349,358
Corporate entities		**1,305,903**	1,541,481
Total	9	**2,213,069**	2,340,693

11. AVAILABLE-FOR-SALE FINANCIAL INVESTMENTS (CONTINUED)

The maturity profile of the available-for-sale financial investments as at the reporting date was as follows:

	2018	2017
	US$'000	US$'000
With a residual maturity of:		
One year or less	**232,125**	161,905
One to five years	**259,194**	406,034
Five to ten years	**1,084,277**	815,825
Over ten years	**637,473**	956,929
Quoted fixed-interest securities	**2,213,069**	2,340,693

During 2018, the highest effective interest rate of quoted fixed-interest securities is 11% per annum, and 95% of the fixed-interest securities held by the Company were investment-grade fixed-interest securities. The unrealised loss related to the Company's available-for-sale financial investments fair value change recognized in other comprehensive income, net of related tax effect, amounted to US$144,736,000. Net losses of US$12,228,000 were removed from other comprehensive income during the year and recognized in profit or loss with the remaining net unrealised loss at the reporting date being US$69,429,000 for available for sale financial assets and net unrealised gains US$179,712,000 for held to maturity financial assets.

During 2017, the highest effective interest rate of quoted fixed-interest securities is 11.38% per annum, and 95% of the fixed-interest securities held by the Company were investment-grade fixed-interest securities. The unrealised gain related to the Company's available-for-sale financial investments fair value change recognized in other comprehensive income, net of related tax effect, amounted to US$53,046,000. Net gains of US$333,000 were removed from other comprehensive income during the year and recognized in profit or loss with the remaining net unrealised gain at the reporting date being US$54,965,000 for available for sale financial assets and US$223,339,000 for held to maturity financial assets.

12. PREPAYMENT AND OTHER DEBTORS – UNSECURED

	2018	2017
	US$'000	US$'000
Prepayments	**157**	240
Other net debtors	**3,510**	2,011
	3,667	2,251

The carrying amounts disclosed above reasonably approximate to their fair values at the reporting date.

13. CASH AND CASH EQUIVALENTS

	2018	2017
	US$'000	US$'000
Cash at bank	**72,400**	56,832

Cash at bank earns interest at floating rates based on daily bank deposit rates.

The carrying amounts disclosed above reasonably approximate to their fair values at the reporting date.

14. FAIR VALUE HIERARCHY

The Company's financial assets and liabilities carried at fair value are classified, for disclosure purposes, based on a hierarchy defined by IFRS/HKFRS 13. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

14. FAIR VALUE HIERARCHY (CONTINUED)

As at December 31, 2018, the Company held the following financial instruments measured at fair value:

	Quoted prices in active market (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
	US$'000	US$'000	US$'000	US$'000
Fixed-interest securities:				
Governments or public authority	**315,724**	**101,916**	**-**	**417,640**
Other fixed-interest listed	**-**	**1,747,694**	**68,347**	**1,816,041**
	315,724	**1,849,610**	**68,347**	**2,233,681**

During the year ended December 31, 2018, there were no transfers of financial instruments between Level 1 and Level 2. US$28,712,277 of other fixed-interest listed securities was transferred from Level 3 into Level 2. The transfer from Level 3 to Level 2 assets at December 31, 2018 is a result of securities having a corroborated price source at December 31, 2018. There were no transfers of other fixed-interest listed securities from Level 2 into Level 3.

14. FAIR VALUE HIERARCHY (CONTINUED)

As at December 31, 2017, the Company held the following financial instruments measured at fair value:

	Quoted prices in active market (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
	US$'000	US$'000	US$'000	US$'000
Fixed-interest securities:				
Governments or public authority	344,345	105,509	-	449,854
Other fixed-interest listed	-	1,870,208	45,773	1,915,981
	344,345	1,975,717	45,773	2,365,835

During the year ended December 31, 2017, there were no transfers of financial instruments between Level 1 and Level 2. US$20,497,000 of other fixed-interest listed securities was transferred from Level 3 into Level 2. The transfer from Level 3 to Level 2 assets at December 31, 2017 is a result of securities having a corroborated price source at December 31, 2017. US$12,241,000 of other fixed-interest listed securities was transferred from Level 2 into Level 3. The transfer from Level 2 to Level 3 assets at December 31, 2017 is a result of securities having an uncorroborated price source at December 31, 2017.

Management has assessed that the fair values of assets and liabilities not measured at fair value including loans, receivables for securities, premiums deferred and uncollected, reinsurance receivables, prepayments and other debtors, accrued income, balances with related companies, cash and cash equivalents, premium deposits, advance premium, claims payable, accrued expenses and other creditors approximate their carrying amounts largely due to the short term maturities of these instruments.

14. FAIR VALUE HIERARCHY (CONTINUED)

As at December 31, 2018, the Company held financial instruments at amortised cost of US$4,491,971,000. If these financial instruments were measured at fair value, they would be reported as follows:

	Quoted prices in active market (Level 1)	**Significant observable inputs (Level 2)**	**Significant unobservable inputs (Level 3)**	**Total**
	US$'000	**US$'000**	**US$'000**	**US$'000**
Held-to-maturity securities:				
Governments or public authority	**104,233**	-	-	**104,233**
Other fixed-interest listed	-	**4,144,559**	**9,910**	**4,154,469**
	104,233	**4,144,559**	**9,910**	**4,258,702**

As at December 31, 2017, the Company held financial instruments at amortised cost of US$4,047,942,000. If these financial instruments were measured at fair value, they would be reported as follows:

	Quoted prices in active market (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
	US$'000	US$'000	US$'000	US$'000
Held-to-maturity securities:				
Governments or public authority	109,781	-	-	109,781
Other fixed-interest listed	-	3,883,721	27,812	3,911,533
	109,781	3,883,721	27,812	4,021,314

14. FAIR VALUE HIERARCHY (CONTINUED)

The movements in fair value measurements in Level 3 during the year were as follows:

	2018	2017
	US$'000	US$'000
Available-for-sale investments – unlisted:		
At January 1	**45,773**	1,193
Total (losses) recognized in profit or loss	**(260)**	(696)
Total (losses)/gains recognized in other comprehensive income	**(1,214)**	(792)
Transfer in	**-**	12,241
Transfer out	**(28,712)**	(20,497)
Purchases	**54,804**	54,399
Disposals	**(2,044)**	(75)
At December 31	**68,347**	45,773

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

General risks

As a life insurance company, the Company is in the "risk" business, and as a result is exposed to a variety of risks. The Company manages risk where business is transacted, based on principles and policies established at the TLIC and AEGON N.V. level.

The operations of the Company are subject to local regulatory requirements in Hong Kong. The regulators are interested in ensuring that the Company maintains an appropriate solvency position to meet unforeseen liabilities arising from economic shocks or natural disasters and that the risk levels are at acceptable levels.

Results of the Company's sensitivity analyses are presented throughout this section to show the estimated sensitivity of net income and equity to various scenarios. For each type of market risk, the analysis shows how net income and equity would have been affected by changes in the relevant risk variable that were reasonably possible at the reporting date.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

General risks (continued)

Each sensitivity analysis reflects the extent to which the shock tested would affect management's critical accounting estimates and judgment in applying the Company's accounting policies. Market-consistent assumptions underlying the measurement of non-listed assets and liabilities are adjusted to reflect the shock tested. The shock may also affect the measurement of assets and liabilities based on assumptions that are not observable in the market. Although management's short-term assumptions may change if there is a reasonable change in a risk factor, long-term assumptions will generally not be revised unless there is evidence that the movement is permanent. This fact is reflected in the sensitivity analyses provided below.

The sensitivities do not reflect what the net income for the period would have been if risk variables had been different because the analysis is based on the exposures in existence at the reporting date rather than on those that actually occurred during the year. Nor are the results of the sensitivities intended to be an accurate prediction of future equity or earnings. The analysis does not take into account the impact of future new business, which is an important component of future earnings. It also does not consider all methods available to management to respond to changes in the financial environment, such as changing investment portfolio allocations or adjusting premiums and crediting rates. Furthermore, the results of the analyses cannot be extrapolated for wider variations since effects do not tend to be linear. No risk management process can clearly predict future results.

Insurance risk

The Company is in the business of insuring against the risk of mortality, disability, accidents, and related risks.

The Company retains the first US$1,000,000 of the net amount at risk per life, with any excess being 50% quota share reinsured through surplus treaties, coinsurance treaties, and facultative reinsurance with reputable international reinsurers. The Company retains a maximum of US$10,000,000 on any one life insured.

As part of the Company's quality control process, the Company regularly allows reinsurers to audit its underwriting and claim practices and procedures to ensure that they meet the highest industry standards.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Credit risk

Premium receivables (included in premiums deferred and uncollected)

The credit risk in respect of customer balances, incurred on the non-payment of premiums or contributions, will only persist during the grace period specified in the policy documents or trust deed on the expiry of which either the premium is paid or the policy will be terminated or changed to reduced paid-up or term cover according to the provision of the policy.

Investment securities

The Company limits its exposure by setting minimum limits of its portfolio mix in fixed-interest securities and maximum limits of its portfolio mix in equities and other investments. The Company also sets maximum limits on currency, maturity, and credit limit on its fixed-income portfolios. The Company only deals with institutions with high creditworthiness.

It is the Company's investment policy to invest in investment-grade fixed-interest securities to limit exposure to credit risk. The Company allows a maximum of 15% of invested assets to be invested in non-investment-grade (below Standard & Poor's rating BBB-) fixed-interest securities. At December 31, 2018 and 2017, the amount of the non-investment-grade fixed-interest securities held by the Company was approximately 5.17% and 5.4% of its invested assets, respectively.

Reinsurance

Certain premiums and benefits are assumed from and ceded to other insurance companies under various reinsurance agreements. The Company reinsures portions of the risk on certain insurance policies which exceed its established limits, thereby providing a greater diversification of risk and minimising exposure on larger risks. The Company remains primarily liable with respect to any insurance ceded and would not be relieved of this liability in the event that the assuming insurance company became unable to meet its obligation under the reinsurance treaty.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Credit risk (continued)

Credit rating

The ratings distribution of the Company's invested assets, organized by rating category, is presented in the table below. Disclosures of ratings follow the Company's Credit Name Limit Policy ("CNLP"). Under the CNLP, a composite rating is used which is based on a combination of the ratings received from external rating agencies. The rating used is the lower of the composite external rating and the internal rating.

	2018	2017

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Credit risk (continued)

Past due but not impaired assets

An asset is past due when a counterparty has failed to make a payment when contractually due. Assets are impaired when an impairment loss has been charged to profit or loss relating to this asset. After the impairment loss is reversed in subsequent periods, the asset is no longer considered to be impaired. When the terms and conditions of financial assets have been renegotiated, the terms and conditions of the new agreement apply in determining whether the financial assets are past due. There are no securities that were past due, securities in the amount of US$6,585,335 were impaired as of December 31, 2018. Securities in the amount of US$365,213 were past due but not impaired as of December 31, 2017.

Interest rate risk

Interest rate risk is the risk that the value or the future cash flows of a financial instrument will fluctuate because of changes in interest rates.

The Company's interest risk policy requires it to manage the interest rate risk by maintaining an appropriate mix of fixed and variable rate instruments. The policy also requires it to manage the maturities of interest-bearing financial assets and interest-bearing financial liabilities.

The sensitivity analysis in the table below shows an estimate of the effect of a parallel shift in the yield curve on net income and equity. Increases in interest rates result in lower universal life policy liabilities mostly offset by change in fair value of investments, which is recognized in other comprehensive income.

	Parallel Movement of Yield Curve (In US$ Millions)			
	Impact on Net Income		**Impact on Shareholder's Equity**	
	2018	2017	**2018**	2017
Shift up 100 basis points	**3.7**	3.7	**(145.9)**	(177.0)
Shift down 100 basis points	**(3.7)**	(3.7)	**145.9**	177.0

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Foreign currency risk

It is the Company's policy to match its assets and liabilities by currency to minimise its exposure to currency risk. The Company sells policies denominated in United States dollars, and its assets are appropriately invested to meet these liabilities. As at the reporting date, there were no investments denominated in foreign currency. The Company's foreign currency exposure from transactions denominated in foreign currencies is not material.

Equity risk

The Company's price risk exposure relates to financial assets and liabilities whose values will fluctuate as a result of changes in market prices, principally investment securities not held for the account of unit-linked business.

Such investment securities are subject to price risk due to changes in market values of instruments arising either from factors specific to individual instruments or their issuers or factors affecting all instruments traded in the market.

The Company's price risk policy requires it to manage such risk by setting and monitoring objectives and constraints on investments and diversification plans and to limit the investment in each country, sector, and market.

Significant changes in equity markets are not expected to have a material impact on the Company's net income or equity due to limited equity investments.

Market risk

Market risk is the risk of changes in fair value of financial instruments from fluctuation in foreign exchange rates (currency risk), market interest rates (interest rate risk), and market prices (price risk), whether such changes in price are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market. These risks have been discussed in the aforesaid sections.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Liquidity risk

Liquidity risk is inherent in the Company's business. Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet cash commitments associated with financial instruments. Liquidity risk may result from the inability to sell financial assets quickly at their fair values, counterparty failing to repay contractual obligation, insurance liability falling due for payment earlier than expected or inability to generate cash inflows as anticipated.

The major liquidity risks the Company confronts are the daily calls on its available cash resources in respect of claims arising from insurance.

The Company manages liquidity through a company liquidity risk policy, which includes determining what constitutes liquidity risk for the Company and the minimum proportion of funds to meet emergency calls, the setting up of contingency funding plans, specifying the sources of funding and the events that would trigger the plan, specifying the concentration of funding sources, the reporting of liquidity risk exposures and breaches to the monitoring authority, monitoring the compliance with liquidity risk policy, and the reviewing of the Company's liquidity risk policy for pertinence and changing environment.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

The tables below analyze certain financial assets and liabilities of the Company as at December 31, 2018 and 2017, into their relevant maturity group based on their remaining periods at the reporting date to their contractual maturities. (For Structured Securities, expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.)

At December 31,2018

	1 year or less US$'000	2 years or less but > 1 year US$'000	3 years or less but > 2 years US$'000	4 years or less but > 3 years US$'000	5 years or less but > 4 years US$'000	> 5 years US$'000	Total US$'000

Accrued expenses and other creditors	48,422	-	-	-	-	-	48,422
	65,586	54,175	53,687	51,630	50,461	5,060,927	5,336,466

Underwriting risk

The Company's earnings depend significantly upon the extent to which actual claims experience is consistent with the assumptions used in setting the prices for products and establishing the technical liabilities and liabilities for claims. To the extent that actual claims experience is less favorable than the underlying assumptions used in establishing such liabilities, income would be reduced. Furthermore, if these higher claims were part of a permanent trend, the Company might be required to increase liabilities, which could reduce income. Note that the impact of mortality changes is partially offset by significant use of third-party reinsurance and coinsurance.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Underwriting risk (continued)

Sensitivity analysis of net income and shareholder's equity to various underwriting risks is shown in the table that follows. The sensitivities represent an increase or decrease of lapse, mortality and morbidity rates. The impact on benefit payments from changes in lapse rates will be offset by changes in provisions. Increases in mortality rates lead to an increase in the level of benefits and claims and liabilities. The impact on net income and equity of sales transactions of investments required to meet the higher cash outflow are reflected in the sensitivities.

	Estimated Effect (In US$ Million)			
	2018		2017	
	On Equity	On Net Income	On Equity	On Net Income
20% increase in lapse rates	**0.9**	**0.9**	0.3	0.3
20% decrease in lapse rates	**(0.9)**	**(0.9)**	(0.3)	(0.3)
10% increase in mortality rates	**(0.9)**	**(0.9)**	(0.4)	(0.4)
10% decrease in mortality rates	**0.9**	**0.9**	0.4	0.4

A shock in mortality or morbidity rates will generally not lead to a change in the assumptions underlying the measurement of the insurance liabilities, as management will recognize that the shock is temporary. However, a long-term expected change in mortality expectations will lead to a change in liabilities. Life insurers are also exposed to longevity risk. In practice, however, this longevity risk can be mitigated, for example, by adjusting premium rates or through reinsurance transactions.

Capital management

Externally imposed capital requirements are set and regulated by the Hong Kong Insurance Ordinance. These requirements are put in place to ensure sufficient solvency margins, to safeguard the Company's ability to continue as a going concern, and to maintain healthy capital ratios in order to support its business objectives and maximise shareholder value.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Capital management (continued)

The Company manages as capital its equity as disclosed in the statement of financial position. The Company manages its capital requirements by assessing shortfalls between reported and required capital levels on a regular basis, in accordance with the Hong Kong Insurance Ordinance. Adjustments to current capital levels are made in light of changes in economic conditions and risk characteristics of the Company's activities.

The Company fully complied with the externally imposed capital requirements during the reported period, and no changes were made to its objectives, policies and processes from the previous period.

16. REINSURANCE

The Company is involved in the assumption of reinsurance from other companies and the cession of reinsurance to other companies, including affiliated companies. Risks are reinsured with other companies to permit the recovery of a portion of the direct losses. Policy liabilities and accruals are reported in the accompanying financial statements on a gross basis for ceded reinsurance. The Company remains primarily liable whether or not the reinsuring companies meet their obligations under these reinsurance treaties.

Premiums earned and provision and claims liability amounts reflect the following reinsurance ceded amounts:

		Ceded/Retroceded to			
	Direct Amount	Unaffiliated Assumed Companies	Affiliated Ceded Companies	Unaffiliated Ceded Companies	Net Amount
	US$'000	US$'000	US$'000	US$'000	US$'000
Year ended December 31, 2018:					
Premium revenue	632,372	-	(19,584)	(36,386)	576,402
At December 31, 2018:					
Provision for future policy benefits	7,980,289	22,144	(2,218,242)	(24,765)	5,759,426
Policy and contract claims payable	19,895	203	(7,638)	(8,737)	3,723
	8,000,184	22,347	(2,225,880)	(33,502)	5,763,149

Accrued salaries	**261**	956
Pledged collateral	**39,844**	30,975
	59,790	48,422

Pledged collateral

TLB pledges assets that are on its statement of financial position in repurchase transactions. More specifically, TLB enters into dollar roll repurchase agreement transactions whereby the Company takes delivery of MBS pools and sells them to a counterparty along with an agreement to repurchase substantially the same pools at some point in the future, typically one month forward. TLB receives cash from the counterparty in an amount at least equal to the fair value of the securities transferred by the Company as of the transaction date. The Company does not have the legal right to recall or substitute the underlying assets prior to the transaction's scheduled termination. Upon scheduled termination, the counterparty is obligated to return substantially similar assets. These transactions are accounted for as collateralized borrowings and the repurchase agreement liability is included in accrued expenses and other creditors.

21. NET RECEIVABLE/(PAYABLE) TO RELATED COMPANIES

	2018	2017
	US$'000	US$'000
Net receivable related to coinsurance agreement	**8,977**	20,848

	2017		
	Gross Liabilities	**Reinsurers' Share**	**Net Liabilities**
	US$'000	**US$'000**	**US$'000**
At January 1	7,076,496	(2,036,661)	5,039,835
Premiums received	870,140	(267,962)	602,178
Change in reserving estimate	(256,481)	(3,805)	(260,286)
Liabilities for death, surrender, maturity	(153,787)	60,104	(93,683)
At December 31	7,536,368	(2,248,324)	5,288,044

As at January 1, 2017, the coinsurance reinsurance agreement with TLIC was amended to increase the ceding percentage from 80% to 100%. Reinsurers' share of includes $207,589,000 of reinsurance premiums paid to TLIC.

22. INSURANCE CONTRACT LIABILITIES (CONTINUED)

Key assumptions

The valuation of liabilities is based upon the regulatory requirements of Hong Kong and the prevailing statutory requirements of the state of domicile of the Company's parent company. For traditional policies (e.g., par whole life, term, non-par whole life), the Company valued its direct liabilities using U.S. statutory requirements. The Company believes this produces an aggregate liability in excess of a Hong Kong regulatory valuation based on the principles of CAP 41E, *Insurance (Determination of Long Term Liabilities)* Rules ("CAP 41E"). Both of these methods use a net level premium reserve method with a cash value floor but use different assumptions. The Company is holding the larger of the two aggregate amounts. For Universal Life policies, liability has been set at 100% of cash surrender value for non-coinsured non-secondary guarantee products and 120% of account value for coinsured or secondary guarantee products floored by the cash surrender value. This amount was determined to be adequate to meet the requirements of CAP 41E and Actuarial Guidance Note 3, based on cash flow testing results.

The principles upon which distributions of profits to participating policyholders are made are based upon a predetermined profit margin which varies by product. Actual experience is monitored, and if experience deviates significantly from that which is expected, a recommendation based upon a formal actuarial report would be made to the Board of Directors.

The mortality tables used in the valuation of traditional policies for statutory requirements are AE, 41CSO, 58CSO, 80CSO, and 2001CSO. For purposes of calculating Hong Kong regulatory provisions, the Company used its expected mortality assumption plus a margin for adverse deviation.

22. INSURANCE CONTRACT LIABILITIES (CONTINUED)

The assumed rate of interest in the statutory liability calculations varies from 2.5% to 6.0%. For purposes of calculating Hong Kong regulatory provisions, the Company used a prudent rate based on the average of (1) U.S. government long-term treasury yield as at the valuation date and (2) average rates of U.S. government long-term treasury fixed-interest securities from 2015-2018.

No explicit provision is made for future expenses or profits in the valuation. These items are implicitly covered by the conservative interest and mortality assumptions used in the calculations of the net premiums.

Sensitivities

The Company's actual claims are compared to the mortality experience assumed in the calculation of the insurance contract liabilities. Mortality experience in 2018 and 2017 has been favorable compared to expectations.

At December 31, 2018 (in US$ million)

	Assumption Change	Impact on Gross Liabilities	Impact on Net Liabilities	Impact on Profit Before Tax	Impact on Equity
Mortality/morbidity	Increase by 10% (i.e., (mortality rate *1.1))	–	–	**(0.9)**	**(0.9)**
Investment return	Decrease by 100 basis points	–	–	**(3.7)**	**145.9**

At December 31, 2017 (in US$ million)

	Assumption Change	Impact on Gross Liabilities	Impact on Net Liabilities	Impact on Profit Before Tax	Impact on Equity
Mortality/morbidity	Increase by 10% (i.e., (mortality rate *1.1))	–	–	(0.4)	(0.4)
Investment return	Decrease by 100 basis points	–	–	(3.7)	177.0

23. RETIREMENT AND COMPENSATION PLANS

All Hong Kong full-time employees are eligible to participate in a defined contribution retirement plan to which both the Company and the employee contribute. The Company and employee contributions are calculated and accrued according to Mandatory Provident Fund Scheme rules or exempted Occupational Retirement Schemes Ordinance whichever is applicable. The Company's expense was US$585,000 and US$403,000 for 2018 and 2017, respectively.

As required by law, the Company makes contributions to the Singapore statutory pension scheme, the Central Provident Fund ("CPF"). CPF contributions are recognized as expense in the same period as the employment that gives rise to the contributions. The Company's expense was US$385,000 and US$346,000 for 2018 and 2017, respectively.

24. DIVIDENDS

The directors approved a dividend of $25,001,760 of which $23,520,000 was paid to TLIC and $1,481,760 to AIBV in the year ending December 31, 2018.

The directors approved a dividend of US$200,269,200, of which $188,400,000 was paid to TLIC and 11,869,200 to AIBV in June 2017.

25. CONTINGENT LIABILITIES

As at December 31, 2018, the Company has undertaken a Letter of Credit with Wells Fargo Bank, N.A. for policies ceded by a 3rd party insurer for an amount of US$2,000,000. The Letter of Credit shall be automatically extended, without written amendment, to July 31 in each succeeding calendar year, unless with a written notice and be at least 60 calendar days after the date of written notification.

26. RELATED PARTY TRANSACTIONS

Details of the material transactions with companies related to the Company were as follows:

	Notes	2018	2017
		US$'000	US$'000
Related party:			
AEGON USA Investment Management LLC			
Interest income on short-term intercompany loans	(i)	**25**	6
Investments handling fee	(ii)	**7,245**	6,383
AEGON NV			
Management fee	(v)	**1,549**	2,760
AEGON INSIGHTS LIMITED			
Management fee and allocated expenses (reimbursements)	(v)	**(175)**	(244)
