Bermuda Long-Term Commercial Insurers

Changes to the 2020 BSCR Model

Below are the changes from the 2019 to 2020 year-end model for Long-Term insurers:

- 1) Schedule V(e) – Stress / Scenario Tests
 - a. Financial Market Scenario – updated stress scenarios and included new R3 Extreme US Yield Curve Widening;
- 2) Schedule V(L) Segregated Accounts – revised segregated accounts schedule to align to the updated regulatory reporting requirements.

Additional Guidance

- i) “Information Sheet” tab paragraph (e) Filing Period – ensure that the filing period start date has been completed and is correct. Note that this will affect the transition rate for the BSCR calculation;
- ii) “Information Sheet” tab paragraph (g) Figures Translated to Bermuda Dollars – ensure that the exchange rate has been completed. Note for insurers that report in currencies other than the Bermuda Dollar or United States Dollar, that the exchange rate to report is the rate to convert the figures to Bermuda Dollar / United States Dollar.
For example, if an insurer reported in Canadian Dollars with an exchange rate of CAD to BDA of 0.7657 and BDA to CAD of 1.3060.
the exchange rate to report in paragraph (g) would be 0.7657
- iii) “Information Sheet” tab paragraph (m)(iv) – the Authority would like to advise that in relation to paragraph (m)(iv) a qualified opinion would not include qualifications for reporting its financial statements as condensed general purpose financial statements.
