ECR
3 (1) An insurer's ECR shall be calculated at the end of its relevant year by reference to the following-

## INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D AND CLASS E SOLVENCY REGUIREMENT) RULES 2011

(a) the Class C, Class D or Class E BSCR model; or
(b) an approved internal capital model,
provided that the ECR shall at all times be an amount equal to, or exceeding, the minimum margin of solvency (as provided in section 6 of the Act).
(2) The ECR applicable to an insurer shall be-
(a) the ECR as calculated at the end of its most recent relevant year; or
(b) the ECR calculated after an adjustment has been made by the Authority under section 6D of the Act and has not been otherwise suspended under section $44 \mathrm{~A}(4)$ of the Act,
whichever is later.
(3) Every insurer shall maintain available statutory economic capital and surplus to an amount that is equal to or exceeds the value of the ECR.
(4) Available statutory economic capital and surplus is determined by calculating the total statutory capital and surplus reported on Form 4EBS, Line 40.
(5) Notwithstanding subparagraph (4), the ECR shall be phased in over a period of three years as follows-
(a) the applicable ECR for the financial year ending 2013 shall be $50 \%$ of the amount determined by Schedule I or an approved internal capital model;
(b) the applicable ECR for the financial year ending 2014 shall be $75 \%$ of the amount determined by Schedule I or an approved internal capital model; and
(c) the applicable ECR for the financial year ending 2015 and beyond shall be the full amount determined by Schedule I or an approved internal capital model.
[Paragraph 3 amended by BR 90 / 2012 para. 4 effective 1 January 2013; subparagraph (3) amended and subparagraph (4) revoked and replaced by BR 58 / 2015 rule 3 effective 1 January 2016]

## BSCR models

4 The Class C, Class D and Class E BSCR models, set out in Schedule I, have effect.
[Paragraph 4 revoked and replaced by BR 90 / 2012 para. 5 effective 1 January 2013]

## Approved internal capital model

5 (1) An insurer may apply to the Authority for approval of an internal capital model to be used in substitution of the Class C, Class D or Class E BSCR model.
(2) Where the Authority is satisfied, having regard to subparagraph (3) that it is appropriate to do so, it may approve the internal capital model and may make its approval subject to conditions.

## INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D AND CLASS E SOLVENCY REGUIREMENT) RULES 2011

(3) In considering an application for approval of an internal capital model the Authority shall have regard to the following matters-
(a) the appropriateness of the internal capital model for the determination of the insurer's capital requirement;
(b) the extent to which the internal capital model has been integrated into the insurer's risk management program; and
(c) the appropriateness of controls applicable to the creation and maintenance of the insurer's internal capital model.
(4) The Authority shall serve notice on an insurer of the following matters-
(a) its decision to approve the internal capital model; or
(b) its decision to not approve the internal capital model and the reason for its decision.
(5) An insurer served with a notice under subparagraph (4)(b) may, within a period of 28 days from the date of the notice, make written representations to the Authority; and where such representations have been made, the Authority shall take them into account in deciding whether to confirm its decision not to approve the insurer's internal capital model.
(6) The Authority may revoke the approval given under subparagraph (2) if satisfied that the insurer has breached a condition of the approval, or where the approved internal capital model is deemed by the Authority no longer appropriate for the determination of the ECR.
(7) The Authority shall serve notice on the insurer of its proposal to revoke its approval of the insurer's internal capital model and the reason for its proposal.
(8) An insurer served with a notice under subparagraph (7) may, within a period of 28 days from the date of the notice, make written representations to the Authority; and where such representations have been made, the Authority shall take them into account in deciding whether to revoke its approval.
[Paragraph 5(1) amended by BR 90 / 2012 para. 6 effective 1 January 2013]

## Capital and solvency return

6 (1) Schedules II, IIA, IIB, IIC, IID, IIE, IIF, IV(A), V, VI, VII, VIII, VIIIA, IX, XII, XIII, XIV, XV, XVI, XVII, XVIII, XIX, XIXA, XX, XXA, XXI, XXIA, XXII, XXIII and XXIV have effect.
(2) Every Class D and Class E insurer shall make a capital and solvency return to the Authority in accordance with Schedules I, II, IIA, IIB, IIC, IID, IIE, IIF, IV(A), V, VI, VII, VIII, VIIIA, IX, XII, XIV, XV, XVI, XVII, XVIII, XIX, XIXA, XX, XXA, XXI, XXIA, XXII, XXIII and XXIV.
(2A) Every Class C insurer shall make a capital and solvency return in accordance with Schedules XIII, XIV and XV.
(3) A capital and solvency return shall comprise the following-

## INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D AND CLASS E SOLVENCY REGUIREMENT) RULES 2011

(a) an electronic version of the Class C, Class D and Class E BSCR models; and
(b) printed versions of the returns prescribed in Schedules II, IIA, IIB, IIC, IID, IIE, IIF, IV(A), V, VI, VII, VIII, VIIIA, IX, XII, XIII, XVI, XVII, XVIII, XIX, XIXA, XX, XXA, XXI, XXIA, XXII, XXIII and XXIV; and
(c) [Revoked by BR 126 / 2019 rule 2]
(3A) A Class C, Class D and a Class E insurer shall, at the time of furnishing its capital and solvency return in accordance with subparagraph (3), also file with the Authority an opinion of its approved actuary, which takes into account its technical provisions calculated in accordance with Line 27C of Form 4EBS and-
(a) in accordance with Schedule XV, for a Class D and E Insurer;
(b) in accordance with Part XV of Schedule XIII, for a Class C insurer.
(4) An insurer shall, on or before its filing date, furnish the Authority with its capital and solvency return.
(5) An insurer shall keep a copy of its capital and solvency return at its principal office for a period of five years, beginning with its filing date, and shall produce it to the Authority if so directed by the Authority on or before a date specified in the direction.
(6) In this paragraph, "filing date" has the meaning given in section 17(4) of the Act.
[Paragraph 6 amended by BR 90 / 2012 para. 7 effective 1 January 2013; subparagraphs (1), (2) and (3)(b) amended by BR 110 / 2013 para. 2 effective 1 January 2014; subparagraphs (1) and (2A) amended and subparagraph (3A) inserted by BR 58 / 2015 rule 4 effective 1 January 2016; subparagraphs (1),(2) and (3)(b) amended by BR $12 / 2016$ rule 2 effective 15 March 2016; subparagraphs (1), (2) and (3)(b) amended by BR 70 / 2016 para. 3 effective 1 January 2017; subparagraphs (1), (2) and (3)(b) amended by BR 68 / 2018 rule 2 effective 1 January 2019; subparagraphs (1), (2) and (3) amended by BR 126 / 2019 rule 2 effective 1 January 2020]

## Declaration of capital and solvency returns

$7 \quad$ Every capital and solvency return made by an insurer under paragraph 6 shall be accompanied with a declaration signed by two directors of the insurer and by the insurer's principal representative declaring that to the best of their knowledge and belief, the return fairly represents the financial condition of the insurer in all material respects.

## Offences

8 Every person who knowingly or recklessly makes a false or misleading statement or return is guilty of an offence and is liable on summary conviction to a fine up to $\$ 50,000$.

## Commencement

9 (1) These Rules come into operation on 31 December 2011.
(2) Notwithstanding subparagraph (1), no person is required to comply with paragraph 3 of these Rules until 1 January 2014.
[Paragraph 9 revoked and replaced by BR 90 / 2012 para. 8 effective 1 January 2013]

## SCHEDULE I (Paragraph 4)

Bermuda Solvency Capital Requirement (Class D and Class E BSCR)

1. The Class D and Class E BSCR shall be established, on an EBS Valuation basis, in accordance with the following formula-

$$
\begin{aligned}
& B S C R=\sqrt{C_{f i}^{2}+C_{e q}^{2}+C_{L T i n t}^{2}+C_{C u r r}^{2}+C_{\text {Conc }}^{2}+C_{L T c r e d}^{2}+\left(C_{L T m o r t}+C_{L T S l}+C_{L T r}\right)^{2}+C_{L T m o r b}^{2}} \\
& \text { cont'd } \sqrt{+C_{L T l o n g}^{2}-.5 \times\left(C_{L T m o r t}+C_{L T s l}+C_{L T r}\right) \times C_{L T l o n g}+C_{L T V A}^{2}+C_{L T o t h e r}^{2}}+C_{o p}+C_{a d j} \\
& +\left[B S C R_{\text {Corr }}-\left(\sqrt{C_{f i}^{2}+C_{e q}^{2}+C_{L T i n t}^{2}+C_{C u r r}^{2}+C_{\text {Conc }}^{2}+C_{L T c r e d}^{2}+\left(C_{L T m o r t}+C_{L T s l}+C_{L T r}\right)^{2}+C_{L T m o r b}^{2}}\right.\right. \\
& \text { cont'd } \left.\left.\sqrt{+C_{L T l o n g}^{2}-.5 \times\left(C_{L T m o r t}+C_{L T s l}+C_{L T r}\right) \times C_{L T l o n g}+C_{L T V A}^{2}+C_{L T o t h e r}^{2}}+C_{o p}+C_{a d j}\right)\right] \\
& \times \text { TransitionalFactor }
\end{aligned}
$$

where-

| $C_{f i}$ | = fixed income investment risk charge as calculated in accordance with paragraph 2; |
| :---: | :---: |
| $C_{e q}$ | = equity investment risk charge as calculated in accordance with paragraph 3; |
| $C_{L T \text { int }}$ | $=$ long-term interest rate and liquidity risk charge as calculated in accordance with paragraph 4; |

INSTRUCTIONS AFFECTING TABLE 1: Capital charge factors for FIastclass $_{i}$
(a) all assets comprising of bonds and debentures, loans, and other miscellaneous investments that are subject to capital charges within the fixed income investment risk charge shall be included;
(b) all non-affiliated quoted and unquoted bonds and debentures shall be included in the fixed income investment charge;
(c) all bonds and debentures, loans, and other miscellaneous investments shall be reported on a basis consistent with that used for purposes of statutory financial reporting;
(d) the capital requirements relating to cash and cash equivalents shall be reduced by a diversification adjustment of up to a maximum of $40 \%$;
(e) the diversification adjustment in paragraph (d) is determined as $40 \%$ multiplied by 1 minus the ratio of the largest cash and cash equivalent balance held with a single counterparty to the total of all cash and cash equivalent balance; and
(f) amounts are to be reported on an EBS Valuation basis.
3. The equity investment risk charge calculation shall be established in accordance with the following formula-

$$
C_{e q}=\sum_{i} \chi_{i} \times \text { Eqastclass }_{i} \text { where }-
$$

$\chi_{i} \quad=$ the capital charge factors prescribed in Table 2 for each type of Eqastclass $_{i} ;$ and
Eqastclass $_{i}=$ value of investment in corresponding asset Class i.

5. The currency risk charge calculation shall be established in accordance with the following formula-
$C_{\text {Curr }}=\sum_{i} \chi_{i} \times\left(\text { Currproxybscr }_{i}+\text { Currliab }_{i}-\text { Currast }_{i}\right)_{\text {where }-}$
$\chi_{i} \quad=25 \%$ where $\left(\right.$ Currast $_{i}-$ Currliab $_{i}-$ Currproxybscr $\left._{i}\right)<0$
$0 \%$ otherwise
Currency $_{i} \quad=$ refers to a currency used by the insurer
GrossCurrast $_{i} \quad=$ value of assets corresponding to Currency ${ }_{i}$ as reported on Form 4EBS Line 15

Currast $_{i} \quad=$ value of assets corresponding to Currency ${ }_{i}$ as reported on Form 4EBS Line 15 adjusted to allow for currency hedging arrangements

GrossCurrliab $_{i} \quad=$ value of liabilities corresponding to Currency ${ }_{i}$ as reported on Form 4EBS Line 39.

Currliab $_{i} \quad=$ value of liabilities corresponding to Currency ${ }_{i}$ as reported on Form
4EBS Line 39 adjusted to allow for currency hedging arrangements
Currproxybscr $_{i} \quad=$ refers to the product of GrossCurrliab $b_{i}$ and BSCR Proxy factor

BSCR Proxy factor = greater of:
i. the Enhanced Capital Requirement divided by Form 4EBS Line 39 Total Liabilities for the preceding year;
ii. the average of the above ratio for the preceding 3 years. where there are no prior submissions available, the BSCR proxy factor is the above ratio that would be obtained from the current submission without taking into account the currency risk charge.

(a) where the insurer uses currency hedging arrangements to manage its currency risk, then Currast $_{i}$ and Currliab $_{i}$ may reflect the impact of those arrangements on GrossCurrast $_{i}$ and GrossCurrliab ${ }_{i}$ of a $25 \%$ adverse movement in foreign exchange currency rates, otherwise the amounts GrossCurrast $i_{i}$ and GrossCurrliab ${ }_{i}$ shall apply;
(b) any adjustment to reflect currency hedging arrangements shall not apply to the calculation of Currproxybscr ${ }_{i}$;
(c) "currency hedging arrangements" means derivative or other risk mitigation arrangements designed to reduce losses due to foreign currency exchange movements, and which meet the Authority's requirements to be classed as such;
(d) insurers are to report currencies representing at least $95 \%$ of their economic balance sheet liabilities; and
(e) amounts are to be reported on an EBS Valuation basis.

(a) all accounts and premiums receivable and all other receivables that are subject to capital charges within the credit risk charge shall be included;
(b) all accounts and premiums receivable, reinsurance balances receivables, all other receivables, and reinsurance recoverable balances shall be reported on a basis consistent with that used for purposes of statutory financial reporting;

## INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D and CLASS E SOLVENCY REQUIREMENT) RULES 2011

(c) collateralized balances are assets pledged in favour of the insurer relating to accounts and premiums receivable;
(d) the net qualifying exposure comprises of reinsurance balances receivable and reinsurance recoverable balances less the corresponding reinsurance balances payable and other payables less the qualifying collateral issued in favour of the insurer in relation to the reinsurance balances;
(e) the net qualifying exposure in instruction (d) shall be subject to the prescribed credit risk capital factor;
(f) the total capital requirement relating to the reinsurance balances shall be reduced by a diversification adjustment of up to a maximum of $40 \%$;
(g) the diversification adjustment in instruction (f) is determined as $40 \%$ multiplied by 1 minus the ratio of the largest net reinsurance exposure, on an individual reinsurer basis, to total net reinsurance exposure; and
(h) amounts are to be reported on an EBS Valuation basis.
8. The long-term insurance risk - mortality capital calculation shall be established in accordance with the following formula -

## INSTRUCTIONS AFFECTING TABLE 1A: Capital charge factors for FIastclass ${ }_{i}$

(a) all assets comprising of bonds and debentures, loans, and other miscellaneous investments that are subject to capital charges within the fixed income investment risk charge shall be included;
(b) all non-affiliated quoted and unquoted bonds and debentures shall be included in the fixed income investment charge;
(c) all bonds and debentures, loans, and other miscellaneous investments shall include amounts reported for economic balance sheet reporting purposes and include fixed income risk exposures as determined by application of the "look-through" approach calculated in accordance with the criteria prescribed by the Authority for the following items:
(i) collective investment vehicles and other investments packaged as funds, including related undertakings used as investment vehicles;
(ii) segregated accounts assets and liabilities;
(iii) deposit asset and liabilities;
(iv) assets and liabilities held by ceding insurers or under retrocession;
(v) other sundry assets and liabilities; and
(vi) derivatives.
(d) The capital requirements relating to cash and cash equivalents shall be reduced by a diversification adjustment of up to a maximum of $40 \%$; and
(e) the diversification adjustment in paragraph (d) is determined as $40 \%$ multiplied by 1 minus the ratio of the largest cash and cash equivalent balance held with a single counterparty to the total of all cash and cash equivalent balance.

## INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D AND CLASS E

SOLVENCY REQUIREMENT) RULES 2011

[^0]
## INSTRUCTIONS AFFECTING TABLE 2B: Shocks for Eqastclass $_{i}$

(a)
all assets (except regulated non-insurance financial operating entities) and liabilities (except the risk margin) whose value is subject to equity risk shocks are to be reported on a basis consistent with that used for the purposes of economic balance sheet reporting. Such assets and liabilities shall include equity risk exposures determined by application of the "look-through" approach calculated in accordance with criteria prescribed by the Authority for the following items:
(i) collective investment vehicles and other investments packaged as funds, including related undertakings used as investment vehicles;
(ii) segregated accounts assets and liabilities;
(iii) deposit asset and liabilities;
(iv) assets and liabilities held by ceding insurers or under retrocession;
(v) other sundry assets and liabilities; and
(vi) derivatives.
(b) for asset types referred to in paragraph (a) (i) to (vi) where the "look through" approach cannot be applied, the residual balance shall be included in "Equity Securities - Other Investments";
(c) short exposures qualifying as assets held for risk-mitigation purposes and short exposures not qualifying as assets held for risk-mitigation purposes, shall both be determined in accordance with criteria prescribed by the Authority; and
(d) amounts are to be reported on an EBS Valuation basis.

23A. The equity investments that are eligible to be used in the calculation of $C_{\text {equity }}^{\text {grandfathred }}$ as defined in paragraph 22 are determined as follows:
i. The average value of equities as percentage of total assets over the prior three financial year ends before January $1^{\text {st }} 2019$ (i.e., over the financial years ending 2016 to 2018) is calculated.
a. Similarly, for each class of equities in accordance with Table 2B, the average amounts as a percentage of total equities shall be determined over the same prior three years, i.e. the allocations for each equity class.
ii. The total amount of equities eligible to be used in the calculation of $C_{\text {equity }}^{\text {grandfatheed }}$ as defined in paragraph 22 at each year end is determined by multiplying the amount of legacy reserves by the equity percentage of paragraph i., where
a. "Legacy reserves" are defined as the long term best estimate labilities, at the applicable point in time (financial year-end), for insurance business carried on as at December 31st 2018.
b. The total amount of equities eligible to be used in the calculation of $C_{\text {equity }}^{\text {grandfathred }}$ as defined in paragraph 22 at each year end shall not be greater than the amount of the legacy reserves.
iii. The equity investments eligible to being used in the calculation of $C_{\text {equity }}^{\text {gratheed }}$ as defined in paragraph 22 per equity class are calculated by multiplying the total amount in paragraph ii. by the equity class allocation in paragraph $i$.
iv. Future applicable reserves shall be capped at the initial reserve. The amount of equities eligible to be used in the calculation of $C_{\text {equity }}^{\text {grandfatheed }}$ as defined in paragraph 22 can therefore never be greater than the initial amount.
v. Equities that are eligible to be used being used in the calculation of $C_{\text {equity }}^{\text {grandfatheed }}$ as defined in paragraph 22 may be traded or replaced within a specific equity class and still receive the aforementioned treatment.

## INSTRUCTIONS AFFECTING TABLE 3C: Shock Vectors for Interest rate - Liquidity

(a) all assets sensitive to interest rates shall be included in the table, including but not limited to fixed income assets, hybrid instruments, deposits, loans (including mortgage and policyholder loans), reinsurance balance receivables and exposures as determined by application of the "look-through" approach calculated in accordance with criteria prescribed by the Authority for the following items:
(i) collective investment vehicles and other investments packaged as funds, including related undertakings used as investment vehicles;
(ii) segregated accounts assets;
(iii) deposit asset;
(iv) other sundry;
(v) derivatives;
(vi) funds held by ceding insurers.
(b) all liabilities sensitive to interest rates shall be included in the table, including but not limited to best estimate of insurance liabilities, other liabilities (except risk margin) and liability exposures determined by application of the "look-through" approach calculated in accordance with the criteria prescribed by the Authority for the following items:
(i) segregated accounts liabilities;
(ii) deposit liabilities;
(iii) other sundry liabilities;
(iv) derivatives;
(v) funds held under retrocession.
(c) amounts are to be reported on an EBS Valuation basis
25. The currency risk charge calculation shall be established in accordance with the following formula-

$$
\left.C_{\text {Currency }}=\sum_{i} \max \left\{\begin{array}{c}
\left(M V A_{i, \text { Before }}-M V A_{i, A f t e r}\left(\chi_{i}\right)\right)+\left(M V D L_{i, \text { Before }}^{Q}-M V D L_{i, A f t e r}^{Q}\left(\chi_{i}\right)\right)+\cdots \\

+ \text { Currproxybscr } r_{i} \times \chi_{i}
\end{array}\right], 0\right\}
$$

Where-
$\chi_{i} \quad=$ the instantaneous shocks prescribed in Table 4A for each type of currency where ( $M V A_{i, B e f o r e}+M V D L_{i, B f \text { fore }}^{Q}+M V D S_{i, B f o r e}^{Q}+M V D L_{i, B e f o r e}^{N Q}+M V D S_{i, B e f o r e}^{N Q}-M V L_{i, B e f o r e}-$ Currproxybscr $_{i}$ )<0 and 0 otherwise;
Currency $_{i} \quad=$ refers to currency type that has been converted to the functional currency as reported in Form 4EBS
$=$ refers to the market value of assets excluding currency-sensitive derivatives prescribed by the Authority by currency type (CCY), that has been converted to the functional currency as reported in Form 4EBS;
$=$ refers to the revaluation of assets excluding currency-sensitive derivatives after shocking by $\boldsymbol{\chi}(\mathrm{CCY})$ where ( CCY ) refers to currency type, and $\chi$ refers to the shock, where the revalued amount has been converted to the functional currency as reported in Form 4EBS;
$=$ refers to the market value of long positions in derivatives qualifying as held for riskmitigating purposes (determined in accordance with the criteria prescribed by the Authority) by currency type (CCY), that has been converted to the functional currency as reported in Form 4EBS;

Where there are no prior submissions available, the BSCR proxy factor is the above ratio that would be obtained from the current submission without taking into account the currency risk charge.

## INSTRUCTIONS AFFECTING TABLE 4A: Shock factors for Currency Risk

(a) The initials " A " to " J " on the column labeled "Shock Otherwise $\chi_{i}$ " shall be replaced by the following shock values:

- "A" by:
" $0 \%$ " if the reporting currency is the Bermuda Dollar or,
" $5.00 \%$ " if the reporting currency is the Qatari Riyal or,
" $1.00 \%$ " if the reporting currency is the Hong Kong Dollar or,
" $25 \%$ " otherwise.
- "B" by:
" $0 \%$ " if the reporting currency is the United States Dollar or, " $25 \%$ " otherwise.
- "C" by:
" $5.00 \%$ " if the reporting currency is the United States Dollar or, " $25 \%$ " otherwise.
- "D" by:
" $1.00 \%$ " if reporting currency is the United States Dollar or,
" $25 \%$ " otherwise.
- "E" by:
" $0.39 \%$ " if the reporting currency is the Danish Krone or,
" $1.81 \%$ " if the reporting currency is the Bulgarian Lev or,
" $2.18 \%$ " if the reporting currency is the West African CFA Franc or,
" $1.96 \%$ " if the reporting currency is the Central African CFA Franc or,
" $2.00 \%$ " if the reporting currency is the Comorian Franc or,
" $25 \%$ " otherwise.
- "F" by:
" $0.39 \%$ " if reporting currency is the Euro or, " $25 \%$ " otherwise.
- "G" by:
" $1.81 \%$ " if reporting currency is the Euro or, "25\%" otherwise.
- "H" by:
" $2.18 \%$ " if reporting currency is the Euro or, " $25 \%$ " otherwise.
- "I" by:
" $1.96 \%$ " if reporting currency is the Euro or, "25\%" otherwise.
- "J" by:
" $2.00 \%$ " if reporting currency is the Euro or, "25\%" otherwise.
(b) all assets and liabilities (except the risk margin) whose value is subject to currency risk shocks shall be reported on a basis consistent with that used for purposes of economic balance sheet reporting. These assets and liabilities shall include currency risk exposures determined by application of the "look-through approach" calculated in accordance with criteria prescribed by the Authority for the following items:
(i) collective investment vehicles and other investments packaged as funds, including related undertakings used as investment vehicles;
(ii) segregated accounts assets and liabilities;
(iii) deposit asset and liabilities;
(iv) assets and liabilities held by ceding insurers or under retrocession;
(v) other sundry assets and liabilities; and
(vi) derivatives.
(c) where the reporting currency is the United States Dollar, the capital factor $\chi_{i}$ charge shall be reduced to:
i. $0.00 \%$ for the Bermuda Dollar;
ii. $\quad 5.00 \%$ for the Qatari Riyal;
iii. $1.00 \%$ for the Hong Kong Dollar.
(d) where the reporting currency is the Bermuda Dollar the capital factor $\chi_{i}$ charge shall be reduced to 0.00\% for the United States Dollar.
(e) where the reporting currency is the Qatari Riyal the capital factor $\chi_{i}$ charge shall be reduced to $5.00 \%$ for the United States Dollar.
(f) where the reporting currency is the Hong Kong Dollar the capital factor $\chi_{i}$ charge shall be reduced to $1.00 \%$ for the United States Dollar.
(g) where the reporting currency is Euros, the capital factor $\chi_{i}$ shall be reduced to:
i. $0.39 \%$ for the Danish Krone;
ii. $\quad 1.81 \%$ for the Bulgarian Lev;
iii. $2.18 \%$ for the West African CFA Franc;
iv. $1.96 \%$ for the Central African CFA Franc;
v. $2.00 \%$ for the Comorian Franc.
(h) where the reporting currency is the Danish Krone the capital factor $\chi_{i}$ charge shall be reduced to $0.39 \%$ for the Euro.
(i) where the reporting currency is the Bulgarian Lev the capital factor $\chi_{i}$ charge shall be reduced to $1.81 \%$ for the Euro.
(j) where the reporting currency is the West African CFA Franc the capital factor $\chi_{i}$ charge shall be reduced to $2.18 \%$ for the Euro.
$(\mathrm{k})$ where the reporting currency is the Central African CFA Franc the capital factor $\chi_{i}$ charge shall be reduced to $1.96 \%$ for the Euro.
(l) where the reporting currency is the Comorian Franc the capital factor $\chi_{i}$ charge shall be reduced to $2.00 \%$ for the Euro.
(m) insurers are to report currencies representing at least $95 \%$ of their economic balance sheet liabilities; and
(n) amounts are to be reported on an EBS Valuation basis.

26. The concentration risk charge calculation shall be determined in accordance with the following formula-

$$
C_{\text {Concentraton }}=\sum_{i} \chi_{i} \times \text { Concastclass }_{i}
$$

Where-

$$
\begin{aligned}
\chi_{i}= & \text { the capital charge factors prescribed in Table 5A for each type of } \\
& \text { Concastclass }_{i} ; \text { or in Table } 5 \text { for each type of Concastclass } \\
& \\
& \text { for equity exposures that are grandfathered according to } \\
& \text { paragraph } 23 \mathrm{~A} \text { and }
\end{aligned}
$$

## INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D and CLASS E SOLVENCY REQUIREMENT) RULES 2011

Concastclass

$=$ the value of the corresponding asset prescribed in Table 5A, for each type of Asset Class; or the value of the corresponding asset prescribed in Table 5 for each type of Asset Class for equity exposures that are grandfathered according to paragraph 23A.

## 

(a) Concastclass ${ }_{i}$ shall only apply to an insurers' ten largest counterparty exposures based on the aggregate of all assets set out in the in Table 5A relating to that counterparty;
(b) for the purposes of Table 5A, a counterparty exposure shall be reported on the valuation of individually underlying assets i.e. determined by application of the "look through" approach in accordance with criteria prescribed by the Authority for all amounts reported on the balance;
(c) for the purposes of Table 5A, a counterparty shall include all related or connected counterparties captured by either of the following criteria:
(i) controller relationship: if a counterparty, directly or indirectly, has control of (as a result of its majority shareholding in or effective management) which it is a subsidiary company; or
(ii) economic interdependence: if one of the counterparties were to experience financial difficulties which directly or indirectly affect the ability of any or all of the remaining counterparties to perform their financial obligations (for example where a counterparty becomes unable to fund or repay certain financial contractual obligations, and as a result, other counterparties, are likely to be unable to fund or repay certain obligations imposed on them);
(d) amounts are to be reported on an EBS Valuation basis.
27. The credit risk charge calculation shall be established in accordance with the following formula-
$C_{\text {credit }}=\sum_{i} \delta_{i} \times$ debtor $_{i} \times \mu_{r}+$ CCROTC $;$
Where-

| $\delta_{i}$ | the credit risk capital charge factor for type of debtor $_{i}$ as prescribed in Ta 6A; |
| :---: | :---: |
| debtor ${ }_{i}$ | receivable amount from debtor $_{i}$ net of any collateral in favour of the insurer; |
| $\mu_{r}$ | additional diversification adjustment factor applied to reinsurance balances only taking into consideration diversification by number of reinsurers, equal to $40 \%$. |
| CCROTC | $=$ counterparty default risk for over-the-counter derivatives calculated as per the following formula: |

CCROTC=

$$
\sum_{i} \operatorname{Max}\left(0, \text { MVDerivative }_{i}-\left(1-\beta_{i}\right) \operatorname{Min}\left(\text { MVderivative } P_{i}, \text { MVCollateral }_{i}\right)\right) \times \alpha_{i}

\section*{INSTRUCTIONS AFFECTING TABLE 6A: Capital charge factors for debtor \(_{i}\)}
(a) all accounts and premiums receivable and all other receivables that are subject to capital charges within the credit risk charge shall be included;
(b) all accounts and premiums receivable, reinsurance balances receivables, all other receivables, and reinsurance recoverable balances shall be reported on a basis consistent with that used for purposes of statutory financial reporting;
(c) collateralized balances are assets pledged in favour of the insurer relating to accounts and premiums receivable;
(d) the net qualifying exposure comprises of reinsurance balances receivable and reinsurance recoverable balances less the corresponding reinsurance balances payable and other payables less the qualifying collateral issued in favour of the insurer in relation to the reinsurance balances;
(e) the net qualifying exposure in instruction (d) shall be subject to the prescribed credit risk capital factor;
(f) the total capital requirement relating to the reinsurance balances shall be reduced by a diversification adjustment of up to a maximum of \(40 \%\);
(g) the diversification adjustment in instruction (f) is determined as \(40 \%\) multiplied by 1 minus the ratio of the largest net reinsurance exposure, on an individual reinsurer basis, to total net reinsurance exposure; and
(h) amounts are to be reported on an EBS Valuation basis.

\section*{INSTRUCTIONS AFFECTING TABLE 14J}
(a) the total score is derived by adding the individual score for each operational risk area corresponding to the stage of the insurer's implementation in respect of its RIP;
(b) where the insurer's assessment of the operational risk area is between stages (i.e. exceeds the criterion for each given stage, while only partially meeting the criterion of the next stage), the insurer shall be deemed to have met the criterion of the lower stage; and
(c) where an operational risk area is not applicable to the insurer's operations, the insurer shall record the reasons for arriving at this conclusion in the comments section and be deemed to have met the criterion of the highest stage.

\section*{INSTRUCTIONS AFFECTING SCHEDULE II:}
(a) fixed income investments, both quoted and unquoted, shall be categorized into corporate bonds and sovereign bonds, residential mortgage-backed securities, commercial mortgage-backed securities/asset-backed securities, and bond mutual funds and classified by BSCR rating;
(b) equity investments, both quoted and unquoted, shall be categorized into common stock, preferred stock and equity mutual funds;
(c) preferred stock shall be classified by BSCR rating;
(d) a list of credit rating agencies and the manner in which ratings issued by such agencies must be applied, shall be prescribed by the Authority and used by insurers in determining the appropriate BSCR rating to be applied to fixed income securities or preferred stock;
(e) where the ratings of a security by different rating agencies differ, the insurer shall classify the security according to the most conservative rating;
(f) unrated securities shall be assigned a BSCR rating of 8;
(g) sovereign debt issued by a country in its own currency that is rated AA- or better shall be classified under BSCR rating 0 while all other sovereign bonds shall be classified in a similar manner as corporate bonds;
(h) debt issued by government-owned and related entities that were explicitly guaranteed by that government, with the exception of mortgage-backed securities, shall be assigned a BSCR rating of 0;
(i) bond mutual funds shall be classified based on the underlying bond ratings as advised by the fund managers; equity mutual funds shall be classified in a similar manner as direct equity investments while money market funds shall be treated as cash and cash equivalents; and
(j) are to be reported on both an EBS Valuation and unconsolidated basis.

\section*{INSTRUCTIONS AFFECTING SCHEDULE VIII:}
1. Factors should be applied to NAR defined as:
(i) Guaranteed minimum accumulation benefit (GMAB) - Total claim payable if all contracts mature immediately
(ii) Guaranteed minimum death benefit (GMDB) - Total claim amount payable upon immediate death of all policyholders
(iii) Guaranteed minimum income benefit (GMIB) - Total claim payable upon full and immediate annuitization of all policies using an \(80 \%\) factor applied to the GV (the \(80 \%\) represents the ratio between current market annuitization factors and the guaranteed annuitization factors)
(iv) Guaranteed minimum withdrawal benefit (GMWB) - Total claim payable if \(100 \%\) of the guaranteed withdrawal benefit base in excess of the current account value is withdrawn immediately
(v) Guaranteed enhanced earnings benefit (GEEB) - Total guaranteed enhanced payments upon immediate death of all policyholders
2. Where ratchets, resets and roll-ups exist, please use the roll-up category.
3. NAR is net of reinsurance.
4. The proportion used for the account value under reinsurance is the proportion used for NAR. and
5. For the purposes of Schedule VIII, "volatility" is defined as the annual volatility of the fund. In the case where there is no, or insufficient, history of the annual volatility of the fund available to determine volatility, the volatility of the benchmark (for the fund) should be used to determine volatility.
6. Amounts are to be reported on both an EBS Valuation and unconsolidated basis.
7. Bermuda EBS best estimate provisions are to be calculated according to the

Economic Balance Sheet valuation principles-
(a) under Schedule XIV in relation to a Class D or Class E insurer;
(b) Part XIV under Schedule XIII in relation to a Class C insurer."

Where:
(a) CISSA capital is the amount of capital the insurer has determined that it requires to achieve its strategic goals upon undertaking an assessment of all material (reasonably foreseeable) risks arising from its operations or operating environment; and
(b) Regulatory capital is determined by the BSCR or regulatory capital determined from an approved internal model for regulatory purposes at 99.0\% TVaR.

\section*{ADDITIONAL INFORMATION}
1. What is the primary reason(s) (select multiple responses where applicable) for aiming at the disclosed CISSA Capital amount? (select all that apply)

\title{
INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D AND CLASS E SOLVENCY REQUIREMENT) RULES 2011
}
- target agency rating (e.g. "A-", "AA", etc.);
- market share;
- business expansion;
- nature of product(s) (e.g. risk characteristics);
- manage downgrade risk;
- regulatory capital requirements; and
- others. \(\qquad\) (Please provide a description)
2. What methodology is used to aggregate the risk categories? (select all that apply)
- correlation matrix;
- linear correlations;
- T copulas;
- gumbel copulas
- clayton copulas;
- causal drivers approach e.g., inflation, cycles; and
- others. \(\qquad\) (Please provide a description)
3. What contingency plans are in place for raising additional capital under stress situations? (select all that apply)
- parental guarantees;
- revolving letters of credit;
- issue subordinated debt;
- issue preference shares;
- float additional shares;
- capital injections from parent;
- contingent surplus notes;
- catastrophe derivatives (e.g. bonds, swaps and options); and
- others. \(\qquad\) (Please provide a description)
4. Does the insurer have arrangements / contractual commitments to provide support, including forward purchase arrangements or guarantees, to affiliates/other companies in stressed situations? (Yes or No)

If yes, briefly describe the arrangement(s) and the aggregate exposure.
5. Has the insurer down streamed debt to establish equity positions or engaged in double or multiple gearing? (Yes or No)

If yes, provide details and amount of capital.
6. Has debt been down streamed to establish equity positions in the insurer, or is the insurer using capital that is double or multiple geared? (Yes or No)

If yes, provide details and amount of capital.
7. Are there any assets of a subsidiary of the insurer that are restricted for use that cannot be transferred to another subsidiary or the insurer, that were not included in the encumbered assets (both for policyholder obligations and not for policyholder obligations) reported in the Schedule of Eligible Capital? (Yes or No)

If yes, provide:
Total restricted assets

Less: Regulatory capital requirements for members for which the assets pertain

\section*{INSTRUCTIONS AFFECTING TABLE 16:}
(a) Total capital pre-diversification between risk categories is derived by aggregating all the risk;
(b) Total capital after diversification between risk categories shall be derived by deducting the diversification benefit (calculated by an insurer) from the "Total capital pre- diversification between risk categories"; and
(c) Where a question/section is not applicable to an insurer or the options provided do not fully reflect the insurer's position, the insurer shall include a brief description.

\section*{CISSA General Questions}
1. CISSA Integration

Is the CISSA and its underlying information integrated (i.e.; considered when making key strategic decisions) into the insurer's strategic and risk management decision-making processes? (Yes or No)

If yes, how is CISSA and its underlying information used? (select all that apply)
- Strategic planning
- Annual business planning
- Setting risk limits
- Defining risk appetite
- Evaluation of capital adequacy
- Allocation of capital to business segments and lines of business
- Capital management
- Determination of rates of return for pricing and underwriting guidelines
- Reinsurance purchase
- Determination of investment policies and strategies
- Meeting regulatory requirements
- Improving credit rating
- Improving investor relations
- Assessing risk adjusted product profitability
- Performance measurement and assessment
- Improving mergers and acquisition decisions
- Others (provide description)
2. Has the insurer applied reverse stress testing to both identify the scenarios that could cause business failure and the required actions to manage such situations? (Yes or No)
3. Is the CISSA process clearly documented and regularly amended for changes in strategic direction, risk management framework, and market developments? (Yes or No)
4. How often is the information underlying CISSA discussed and reviewed by the board of directors, and chief and senior executives?
5. Has the board and chief and senior executives ensured that an appropriate oversight process is in place, including an appropriate level of independent verification, whereby material deficiencies are reported on a timely basis and suitable actions taken? (Yes or No)

\section*{INSTRUCTIONS AFFECTING TABLE 16A:}
- Where a question/section is not applicable to an insurer or the options provided do not fully reflect the insurer's position, a brief description shall be included in the comment fields.
- Independent verification shall be conducted by an internal or external auditor or any other appropriately skilled internal or external function, as long as they have not been responsible for the part of the CISSA process they review, and are therefore deemed to be independent in their assessment.
- In relation to intra-group transactions, materiality will be defined as:

\section*{INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D AND CLASS E SOLVENCY REQUIREMENT) RULES 2011}
(i) an intra-group transaction whose impact can cause a reduction in the insurer's available statutory capital and surplus by \(5 \%\) or more;
(ii) a series of linked intra-group transactions that can cumulatively reduce an insurer's available capital and surplus by \(10 \%\) or more; and
(iii) Qualitative risk characteristics of the transaction: for example, a transaction may be assessed as high risk; however, the quantitative impact remains unknown.

\section*{TABLE 16B}

\section*{CISSA Assessment of Material Risks of the Insurer}

The board must review policies, processes, and procedures to assess its material risks and selfdetermine the capital requirement it would need to support the insurance undertaking, at least annually. Minimally, the assessment should:
- Be an integral part of the insurer's risk management framework;
- Be clearly documented, reviewed, and evaluated regularly by the board and the chief and senior executives to ensure continual advancement in light of changes in the strategic direction, risk management framework, and market developments; and
- Ensure an appropriate oversight process whereby material deficiencies are reported on a timely basis and suitable actions taken.

The insurer shall undertake and file with the Authority the insurer's most recent report ("insurerspecific report") comprising a solvency self-assessment of the insurer's material risks and the determination of both the quality (types of capital) and quantity of CISSA capital required to cover these risks, while remaining solvent and achieving the insurer's business goals.

The insurer-specific report should minimally include:
1. Date the assessment was completed and the insurer-specific report last updated.
2. A description of the insurer's business and strategy.
3. The identification and assessment of all reasonably foreseeable material risks, including those specified in the Insurance Code of Conduct (i.e. insurance underwriting risk; investment, liquidity, and concentration risk; market risk; credit risk; operational risk; group risk; strategic risk; reputational risk; and legal risk).
4. The identification of the relationships of the material risks with one another, and the quantity and type of capital required to cover the risks.
5. A description of the insurer's risk appetite, including limits imposed, how they are enforced, and their key performance indicators.
6. Assumptions and methodology used to assess and aggregate risks.
7. A forward-looking analysis of the risks faced by the insurer over its planning horizon and an analysis demonstrating the ability to manage its business and capital needs in adverse circumstances and still meet regulatory capital requirements.
8. An evaluation of whether the insurer has sufficient capital and liquidity available, including an assessment of whether capital is fungible and assets are transferable, to achieve its strategic goals over its planning horizon and any potential adverse consequences if insufficient.
9. A description of business continuity and disaster plans.
10. A description of how the results of the self-assessment are integrated into the management and strategic decision making process.
11. For each material risk identified under 3 above, the submission should minimally include:
(a) Identification of the risk owner, qualifications and responsibilities.
(b) The key performance indicators used to monitor compliance with the risk appetite.
(c) The risk drivers (e.g. for catastrophe risk the drivers could be US earthquake, European windstorm, terrorism, etc.)
(d) The primary model(s)/tool(s) used to calculate the CISSA capital for the risk, where applicable.
(e) The primary sources of data used as inputs to the model(s)/tool(s).
(f) The key assumptions used in the assessment of the risk.
(g) A description and quantitative impact of stress and scenario testing (if any) on capital including key assumptions.
(h) A description of measures taken to transfer or otherwise mitigate the risk.
(i) Quantification of the risk if the insurer is holding capital against it both pre and post diversification.
(j) An explanation of the primary reasons for any material deviations between the CISSA capital as it pertains to the risk (if holding capital against the risk) and the regulatory capital charge for the risk, if the deviation is greater than \(15 \%\).
12. Model(s)/tool(s) used to calculate the CISSA capital

The insurer should review and provide answers to the following questions on the model(s)/tool(s) used to calculate the CISSA capital

\section*{Governance}
(a) Does the board of directors, chief and senior executives approve the design, maintenance and use of the model(s)/tool(s)?
(b) How often does the board or relevant board committees review outputs, changes and issues arising from the \(\operatorname{model}(\mathrm{s}) / \operatorname{tool}(\mathrm{s})\) (review should be documented e.g. minutes, presentations etc.)?
(c) Does the board and chief and senior executives have a general understanding of the key assumptions/elements and the implications of the outputs (including limitations) of the model(s)/tool(s)?

\section*{Validation}
(d) Is the model(s)/tool(s) subject to a regular cycle of validation; which includes the monitoring of performance, review of appropriateness of model specifications and testing of forecast results against actual results?
(e) How often is the validation of the model(s)/tool(s) performed?
(f) Does the validation process demonstrate that the model(s)/tool(s) remain suitable during changing conditions (e.g. changes in inflation, interest rate, etc.)? If no, provide comments.

\section*{Documentation}
(g) Does the insurer have formal documentation of the structure, design, operational details, input assumptions, parameters, governance process and controls of the model(s)/tool(s)?
(h) If yes, to what extent is the model(s)/tool(s) documented such that it can be used by new personnel with limited user experience? (include comments for partial or no documentations)
(i) How often does the board of directors or chief and senior executives review and approve the model/input documentation?

\section*{Internal controls}
(j) How does the insurer rate the effectiveness of the controls in place to monitor and evaluate the operation and maintenance of the model(s)/tool(s)?
(k) Are there strict protocols in place restricting access to the model(s)/tool(s) and ability to make adjustments thereto?

\section*{Others}
(1) What is the risk measure (VaR, TVaR etc.), confidence interval ( \(95 \%, 99.95 \%\) etc.) and time horizon ( 1 year, 3 years etc.) used to derive the CISSA capital?

\section*{INSTRUCTIONS AFFECTING TABLE 16B:}

The insurer shall select the appropriate response. Where an optional attachment is provided to disclose additional information, an insurer shall include references (e.g. page number, paragraph number) of where the information can be located within the attachment.

\section*{SCHEDULE XII \\ Schedule of Eligible Capital}
(Paragraph 6)

The schedule of eligible capital shall provide particulars of the following matters on an EBS Valuation basis:
(a) Tier 1, Tier 2 and Tier 3 eligible capital (Table 17); and

The total score is derived by adding the score for each criterion of an insurer's risk management function that the insurer has implemented
16. The regulatory capital requirement for regulated non-insurance financial operating entities shall be determined in accordance with Part XVI - "Schedule of Regulated Non-Insurance Financial Operating Entities". This amount shall be equal to the sum of the insurer's proportionate share of each entity's regulatory capital requirement in accordance with the applicable solvency laws of the jurisdiction where the entity is licensed or registered. The operational risk charge calculation shall be established in accordance with the following formula.
17. The \(B S C R_{\text {Corr }}\) shall be established on an economic balance sheet (EBS) valuation basis in accordance with the following formula-
\(B S C R_{\text {Corr }}=\) Basic BSCR \(+C_{\text {operationd }}+C_{\text {regulatoradj }}+C_{\text {otheradj }}+C_{\text {AdjTP }} ;\)

(f) all assets comprising of bonds and debentures, loans, and other miscellaneous investments that are subject to capital charges within the fixed income investment risk charge shall be included;
(g) all non-affiliated quoted and unquoted bonds and debentures shall be included in the fixed income investment charge;
(h) all bonds and debentures, loans, and other miscellaneous investments shall include amounts reported for economic balance sheet reporting purposes and include fixed income risk exposures as determined by application of the "look-through" approach calculated in accordance with the criteria prescribed by the Authority for the following items:
(vii) collective investment vehicles and other investments packaged as funds, including related undertakings used as investment vehicles;
(viii) segregated accounts assets and liabilities;
(ix) deposit asset and liabilities;
(x) assets and liabilities held by ceding insurers or under retrocession;
(xi) other sundry assets and liabilities; and
(xii) derivatives.
(i) The capital requirements relating to cash and cash equivalents shall be reduced by a diversification adjustment of up to a maximum of \(40 \%\); and
(j) the diversification adjustment in paragraph (d) is determined as \(40 \%\) multiplied by 1 minus the ratio of the largest cash and cash equivalent balance held with a single counterparty to the total of all cash and cash equivalent balance.

\section*{INSTRUCTIONS AFFECTING TABLE 2B: Shocks for Eqastclass \(_{i}\)}
(a) all assets (except regulated non-insurance financial operating entities) and liabilities (except the risk margin) whose value is subject to equity risk shocks are to be reported on a basis consistent with that used for the purposes of economic balance sheet reporting. Such assets and liabilities shall include equity risk exposures determined by application of the "look-through" approach calculated in accordance with criteria prescribed by the Authority for the following items:
(i) collective investment vehicles and other investments packaged as funds, including related undertakings used as investment vehicles;
(ii) segregated accounts assets and liabilities;
(iii) deposit asset and liabilities;
(iv) assets and liabilities held by ceding insurers or under retrocession;
(v) other sundry assets and liabilities; and
(vi) derivatives.
(b) for asset types referred to in paragraph (a) (i) to (vi) where the "look through" approach cannot be applied, the residual balance shall be included in "Equity Securities - Other Investments";
(c) short exposures qualifying as assets held for risk-mitigation purposes and short exposures not qualifying as assets held for risk-mitigation purposes, shall both be determined in accordance with criteria prescribed by the Authority; and
(d) amounts are to be reported on an EBS Valuation basis.

23A. The equity investments that are eligible to be used in the calculation of \(C_{\text {equity }}^{\text {grandfathred }}\) as defined in paragraph 22 are determined as follows:
i. The average value of equities as percentage of total assets over the prior three financial year ends before January \(1^{\text {st }} 2019\) (i.e., over which the financial years ending 2016 to 2018) is calculated.
a. Similarly, for each class of equities in accordance with Table 2B, the average amounts as a percentage of total equities shall be determined over the same prior three years, i.e. the allocations for each equity class.
ii. The total amount of equities eligible to be used in the calculation of \(C_{\text {equity }}^{\text {grandfathed }}\) as defined in paragraph 22 at each year end is determined by multiplying the amount of legacy reserves by the equity percentage of paragraph i., where
a. "Legacy reserves" are defined as the long term best estimate labilities, at the applicable point in time (financial year-end), for insurance business carried on as at December 31st 2018.
b. The total amount of equities eligible to be used in the calculation of \(C_{\text {equity }}^{\text {grandfathed }}\) than the amount of the legacy reserves.
iii. The equity investments eligible being used in the calculation of \(C_{\text {equity }}^{\text {grandfatheed }}\) as defined in paragraph 22 per equity class are calculated by multiplying the total amount in paragraph ii. by the equity class allocation in paragraph i.
iv. Future applicable reserves shall be capped at the initial reserve. The amount of equities eligible to be used in the calculation of \(C_{\text {equity }}^{\text {grandfatheed }}\) as defined in paragraph 22 can therefore never be greater than the initial amount.
v. Equities that are eligible to be used being used in the calculation of \(C_{\text {equity }}^{\text {grandfatheed }}\) as defined in paragraph 22 may be traded or replaced within a specific equity class and still receive the aforementioned treatment.

24. The interest rate and liquidity risk charge calculation may be calculated in accordance with paragraph 4 or the formula below. Where an insurer decides to utilise the formula below, it will only be allowed to revert back and utilise the calculations prescribed in paragraph 4 where it has received the written approval of the Authority pursuant to an application made in accordance with section 6D of the Act.

\section*{INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D and CLASS E SOLVENCY REQUIREMENT) RULES 2011}

\section*{INSTRUCTIONS AFFECTING TABLE 3C: Shock Vectors for Interest rate - Liquidity}
(a) all assets sensitive to interest rates shall be included in the table, including but not limited to fixed income assets, hybrid instruments, deposits, loans (including mortgage and policyholder loans), reinsurance balance receivables and exposures as determined by application of the "look-through" approach calculated in accordance with criteria prescribed by the Authority for the following items:
(i) collective investment vehicles and other investments packaged as funds, including related undertakings used as investment vehicles;
(ii) segregated accounts assets;
(iii) deposit asset;
(iv) other sundry;
(v) derivatives;
(vi) funds held by ceding insurers.
(b) all liabilities sensitive to interest rates shall be included in the table, including but not limited to best estimate of insurance liabilities, other liabilities (except risk margin) and liability exposures determined by application of the "look-through" approach calculated in accordance with the criteria prescribed by the Authority for the following items:
(i) segregated accounts liabilities;
(ii) deposit liabilities;
(iii) other sundry liabilities;
(iv) derivatives;
(v) funds held under retrocession.
(c) amounts are to be reported on an EBS Valuation basis.
25. The currency risk charge calculation shall be established in accordance with the following formula-
\[
\left.C_{\text {Currency }}=\sum_{i} \max \left\{\begin{array}{c}
\left(M V A_{i, B e f o r e}-M V A_{i, A f t e r}\left(\chi_{i}\right)\right)+\left(M V D L_{i, \text { Before }}^{Q}-M V D L_{i, \text { After }}^{Q}\left(\chi_{i}\right)\right)+\cdots \\

+\max \left(M V D S_{i, B e f o r e}^{N Q}-M V D S_{i, A f t e r}^{N Q}\left(\chi_{i}\right), 0\right)-\left(M V L_{i, B e f o r e}-M V L_{i, A f t e r}\left(\chi_{i}\right)\right)+\cdots \\
+ \text { Currproxybscr } r_{i} \times \chi_{i}
\end{array}\right], 0\right\}
\]

Where-
\(\chi_{i} \quad=\) the instantaneous shocks prescribed in Table 4A for each type of currency where

Currproxybscr \(_{i}\) )<0 and 0 otherwise;
Currency \(_{i}=\) refers to currency type that has been converted to the functional currency as reported in Form 4EBS
\(=\) refers to the market value of assets excluding currency-sensitive derivatives prescribed by the Authority by currency type (CCY), that has been converted to the functional currency as reported in Form 4EBS;
\(M V A_{i, A f t e r}\)
\(M V D L_{i, B e f o r e}^{Q}\)
\(M V D L_{i, A f t e r}^{Q}\)
\(=\) refers to the revaluation of assets excluding currency-sensitive derivatives after shocking by \(\chi(\mathrm{CCY})\) where (CCY) refers to currency type, and \(\chi\) refers to the shock, where the revalued amount has been converted to the functional currency as reported in Form 4EBS;
\(=\) refers to the market value of long positions in derivatives qualifying as held for riskmitigating purposes (determined in accordance with the criteria prescribed by the Authority) by currency type (CCY), that has been converted to the functional currency as reported in Form 4EBS;
\(=\) refers to the revaluation of long positions in derivatives qualifying as held for risk-mitigating purposes (determined in accordance with the criteria prescribed by the Authority) after

" \(0 \%\) " if the reporting currency is the United States Dollar or,
" \(25 \%\) " otherwise.
- "C" by:
" \(5.00 \%\) " if the reporting currency is the United States Dollar or, " \(25 \%\) " otherwise.
- "D" by:
" \(1.00 \%\) " if reporting currency is the United States Dollar or, "25\%" otherwise.
- "E" by:
" \(0.39 \%\) " if the reporting currency is the Danish Krone or,
" \(1.81 \%\) " if the reporting currency is the Bulgarian Lev or,
" \(2.18 \%\) " if the reporting currency is the West African CFA Franc or,
" \(1.96 \%\) " if the reporting currency is the Central African CFA Franc or,
" \(2.00 \%\) " if the reporting currency is the Comorian Franc or,
"25\%" otherwise.
- "F" by:
" \(0.39 \%\) " if reporting currency is the Euro or,

" \(2.00 \%\) " if reporting currency is the Euro or, " \(25 \%\) " otherwise.
(b) all assets and liabilities (except the risk margin) whose value is subject to currency risk shocks shall be reported on a basis consistent with that used for purposes of economic balance sheet reporting. These assets and liabilities shall include currency risk exposures determined by application of the "look-through approach" calculated in accordance with criteria prescribed by the Authority for the following items:
(i) collective investment vehicles and other investments packaged as funds, including related undertakings used as investment vehicles;
(ii) segregated accounts assets and liabilities;
(iii) deposit asset and liabilities;
(iv) assets and liabilities held by ceding insurers or under retrocession;
(v) other sundry assets and liabilities; and
(vi) derivatives.
(c) where the reporting currency is the United States Dollar, the capital factor \(\chi_{i}\) charge shall be reduced to:
i. \(0.00 \%\) for the Bermuda Dollar;

\section*{INSTRUCTIONS AFFECTING TABLE 5A: Capital factor charge for Concastclass}
(a) Concastclass \({ }_{i}\) shall only apply to an insurers' ten largest counterparty exposures based on the aggregate of all assets set out in the in Table 5A relating to that counterparty;
(b) for the purposes of Table 5A, a counterparty exposure shall be reported on the valuation of individually underlying assets i.e. determined by application of the "look through" approach in accordance with criteria prescribed by the Authority for all amounts reported on the balance;
(c) for the purposes of Table 5A, a counterparty shall include all related or connected counterparties captured by either of the following criteria:
(i) controller relationship: if a counterparty, directly or indirectly, has control of (as a result of its majority shareholding in or effective management) which it is a subsidiary company; or
(ii) economic interdependence: if one of the counterparties were to experience financial difficulties which directly or indirectly affect the ability of any or all of the remaining counterparties to perform their financial obligations (for example where a counterparty becomes unable to fund or repay certain financial contractual obligations, and as a result, other counterparties, are likely to be unable to fund or repay certain obligations imposed on them);
(d) amounts are to be reported on an EBS Valuation basis.
27. The credit risk charge calculation shall be established in accordance with the following formula-
\(C_{\text {credit }}=\sum_{i} \delta_{i} \times\) debtor \(\times \mu_{r}+\) CCROTC \(;\)

\section*{INSTRUCTIONS AFFECTING TABLE 6A: Capital charge factors for debtor \(_{i}\)}
(i) all accounts and premiums receivable and all other receivables that are subject to capital charges within the credit risk charge shall be included;
(j) all accounts and premiums receivable, reinsurance balances receivables, all other receivables, and reinsurance recoverable balances shall be reported on a basis consistent with that used for purposes of statutory financial reporting;
(k) collateralized balances are assets pledged in favour of the insurer relating to accounts and premiums receivable;
(1) the net qualifying exposure comprises of reinsurance balances receivable and reinsurance recoverable balances less the corresponding reinsurance balances payable and other payables less the qualifying collateral issued in favour of the insurer in relation to the reinsurance balances;
\((\mathrm{m})\) the net qualifying exposure in instruction (d) shall be subject to the prescribed credit risk capital factor;
(n) the total capital requirement relating to the reinsurance balances shall be reduced by a diversification adjustment of up to a maximum of \(40 \%\);
(o) the diversification adjustment in instruction ( f ) is determined as \(40 \%\) multiplied by 1 minus the ratio of the largest net reinsurance exposure, on an individual reinsurer basis, to total net reinsurance exposure; and
(p) amounts are to be reported on an EBS Valuation basis.

\section*{INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D AND CLASS E} SOLVENCY REQUIREMENT) RULES 2011

\section*{INSTRUCTIONS AFFECTING PART VIII:}
1. Factors should be applied to NAR defined as:
(i) Guaranteed minimum accumulation benefit (GMAB) - Total claim payable if all contracts mature immediately
(ii) Guaranteed minimum death benefit (GMDB) - Total claim amount payable upon immediate death of all policyholders
(iii) Guaranteed minimum income benefit (GMIB) - Total claim payable upon full and immediate annuitization of all policies using an \(80 \%\) factor applied to the GV (the \(80 \%\) represents the ratio between current market annuitization factors and the guaranteed annuitization factors)
(iv) Guaranteed minimum withdrawal benefit (GMWB) - Total claim payable if \(100 \%\) of the guaranteed withdrawal benefit base in excess of the current account value is withdrawn immediately
(v) Guaranteed enhanced earnings benefit (GEEB) - Total guaranteed enhanced payments upon immediate death of all policyholders
2. Where ratchets, resets and roll-ups exist, please use the roll-up category.
3. NAR is net of reinsurance.
4. The proportion used for the account value under reinsurance is the proportion used for NAR.
5. For the purposes of Schedule VIII, "volatility" is defined as the annual volatility of the fund. In the case where there is no, or insufficient, history of the annual volatility of the fund available to determine volatility, the volatility of the benchmark (for the fund) should be used to determine volatility.
6. Amounts are to be reported on both an EBS Valuation and unconsolidated basis.
7. Bermuda EBS best estimate provisions [are those requirements calculated to the best of the insurer's ability at the time such insurer is required to comply with Form 4EBS requirements.

Where:
(a) CISSA capital is the amount of capital the insurer has determined that it requires to achieve its strategic goals upon undertaking an assessment of all material (reasonably foreseeable) risks arising from its operations or operating environment; and
(b) Regulatory capital is determined by the Class BSCR as prescribed in Part XIII or regulatory capital determined from an approved internal model for regulatory purposes at \(99.0 \%\) TVaR.

\section*{ADDITIONAL INFORMATION}
8. What is the primary reason(s) (select multiple responses where applicable) for aiming at the disclosed CISSA Capital amount? (select all that apply)
- target agency rating (e.g. "A-", "AA", etc.);
- market share;
- business expansion;
- nature of product(s) (e.g. risk characteristics);
- manage downgrade risk;
- regulatory capital requirements; and
- others. \(\qquad\) (Please provide a description)
9. What methodology is used to aggregate the risk categories? (select all that apply)
- correlation matrix;
- linear correlations;
- T copulas;
- gumbel copulas
- clayton copulas;
- causal drivers approach e.g., inflation, cycles; and
- others. \(\qquad\) (Please provide a description)
10. What contingency plans are in place for raising additional capital under stress situations? (select all that apply)
- parental guarantees;
- revolving letters of credit;
- issue subordinated debt;
- issue preference shares;
- float additional shares;
- capital injections from parent;
- contingent surplus notes;
- catastrophe derivatives (e.g. bonds, swaps and options); and
- others. \(\qquad\) (Please provide a description)
11. Does the insurer have arrangements / contractual commitments to provide support, including forward purchase arrangements or guarantees, to affiliates/other companies in stressed situations? (Yes or No)

If yes, briefly describe the arrangement(s) and the aggregate exposure.
12. Has the insurer down streamed debt to establish equity positions or engaged in double or multiple gearing? (Yes or No)

If yes, provide details and amount of capital.
13. Has debt been down streamed to establish equity positions in the insurer, or is the insurer using capital that is double or multiple geared? (Yes or No)

If yes, provide details and amount of capital.
14. Are there any assets of a subsidiary of the insurer that are restricted for use that cannot be transferred to another subsidiary or the insurer, that were not included in the encumbered assets (both for policyholder obligations and not for policyholder obligations) reported in the Schedule of Eligible Capital? (Yes or No)

If yes, provide:
Total restricted assets
XXX
Less: Regulatory capital requirements for members for which the assets pertain XXX
Restricted assets in excess of capital requirements to the extent that these amounts are not included in the Encumbered assets reported in the Schedule of Eligible Capital

\section*{INSTRUCTIONS AFFECTING TABLE 16:}
(a) Total capital pre-diversification between risk categories is derived by aggregating all the risk;
(b) Total capital after diversification between risk categories shall be derived by deducting the diversification benefit (calculated by an insurer) from the "Total capital pre- diversification between risk categories"; and
(c) Where a question/section is not applicable to an insurer or the options provided do not fully reflect the insurer's position, the insurer shall include a brief description.

\section*{TABLE 16A}

CISSA General Questions
6. CISSA Integration

Is the CISSA and its underlying information integrated (i.e.; considered when making key strategic decisions) into the insurer's strategic and risk management decision-making processes? (Yes or No)

If yes, how is CISSA and its underlying information used? (select all that apply)
- Strategic planning
- Annual business planning
- Setting risk limits
- Defining risk appetite
- Evaluation of capital adequacy
- Allocation of capital to business segments and lines of business
- Capital management
- Determination of rates of return for pricing and underwriting guidelines
- Reinsurance purchase
- Determination of investment policies and strategies
- Meeting regulatory requirements
- Improving credit rating
- Improving investor relations
- Assessing risk adjusted product profitability
- Performance measurement and assessment
- Improving mergers and acquisition decisions
- Others (provide description)
7. Has the insurer applied reverse stress testing to both identify the scenarios that could cause business failure and the required actions to manage such situations? (Yes or No)
8. Is the CISSA process clearly documented and regularly amended for changes in strategic direction, risk management framework, and market developments? (Yes or No)
9. How often is the information underlying CISSA discussed and reviewed by the board of directors, and chief and senior executives?
10. Has the board and chief and senior executives ensured that an appropriate oversight process is in place, including an appropriate level of independent verification, whereby material deficiencies are reported on a timely basis and suitable actions taken? (Yes or No)

\section*{INSTRUCTIONS AFFECTING TABLE 16A:}
- Where a question/section is not applicable to an insurer or the options provided do not fully reflect the insurer's position, a brief description shall be included in the comment fields.
- Independent verification shall be conducted by an internal or external auditor or any other appropriately skilled internal or external function, as long as they have not been responsible for the part of the CISSA process they review, and are therefore deemed to be independent in their assessment.
- In relation to intra-group transactions, materiality will be defined as:
(i) an intra-group transaction whose impact can cause a reduction in the insurer's available statutory capital and surplus by \(5 \%\) or more;
(ii) a series of linked intra-group transactions that can cumulatively reduce an insurer's available capital and surplus by \(10 \%\) or more; and
(iii) Qualitative risk characteristics of the transaction: for example, a transaction may be assessed as high risk; however, the quantitative impact remains unknown.

INSURANCE (PRUDENTIAL STANDARDS) (CLASS C, CLASS D AND CLASS E SOLVENCY REQUIREMENT) RULES 2011
}

TABLE 16B
CISSA Assessment of Material Risks of the Insurer
The board must review policies, processes, and procedures to assess its material risks and selfdetermine the capital requirement it would need to support the insurance undertaking, at least annually. Minimally, the assessment should:
- Be an integral part of the insurer's risk management framework;
- Be clearly documented, reviewed, and evaluated regularly by the board and the chief and senior executives to ensure continual advancement in light of changes in the strategic direction, risk management framework, and market developments; and
- Ensure an appropriate oversight process whereby material deficiencies are reported on a timely basis and suitable actions taken.

The insurer shall undertake and file with the Authority the insurer's most recent report ("insurerspecific report") comprising a solvency self-assessment of the insurer's material risks and the determination of both the quality (types of capital) and quantity of CISSA capital required to cover these risks, while remaining solvent and achieving the insurer's business goals.
1. Date the assessment was completed.
2. A description of the insurer's business and strategy.
3. The identification and assessment of all reasonably foreseeable material risks (i.e. insurance underwriting risk; investment, liquidity, and concentration risk; market risk; credit risk; operational risk; group risk; strategic risk; reputational risk; and legal risk).
4. The identification of the relationships of the material risks with one another, and the quantity and type of capital required to cover the risks.
5. A description of the insurer's risk appetite, including limits imposed, how they are enforced.
6. Assumptions and methodology used to assess and aggregate risks.
7. A forward-looking analysis of the risks faced by the insurer over its planning horizon and an analysis demonstrating the ability to manage its business and capital needs in adverse circumstances and still meet regulatory capital requirements.
8. An evaluation of whether the insurer has sufficient capital and liquidity available, including an assessment of whether capital is fungible and assets are transferable, to achieve its strategic goals over its planning horizon and any potential adverse consequences if insufficient.
9. A description of business continuity and disaster plans.
10. A description of how the results of the self-assessment are integrated into the management and strategic decision making process.
11. For each material risk identified the submission should minimally include:

\section*{PART XII \\ Schedule of Eligible Capital}

\section*{INSTRUCTIONS AFFECTING FORM 4EBS}

\section*{Economic Balance Sheet valuation principles}
1. The economic balance sheet (EBS) shall be produced on a consolidated basis in line with GAAP principles adopted by the insurer, as notified and agreed by the Authority ("GAAP Principles"). Except where specifically mentioned below, the consolidated assets and liabilities shall be assessed and fair-valued in line with the GAAP principles adopted by the insurer, as notified to and agreed by the Authority.
2. For cases where the GAAP principles permit both a fair value model and a non-economic valuation model for valuing an asset or liability, the insurer shall apply the fair value model.
3. For cases where the GAAP principles do not require an economic valuation the insurer shall fair value the asset or liability using the following hierarchy of high level principles of valuation of assets and liabilities:
(a) Quoted market prices in active markets for the same or similar assets or liabilities must be used whenever possible;
(b) Where the use of quoted market prices for the same assets or liabilities is not possible, quoted market prices in active markets for similar assets and liabilities with adjustments to reflect differences shall be used;
(c) If there are no quoted market prices in active markets available, mark-to-model techniques, which are alternative valuation techniques that have to be benchmarked, extrapolated or otherwise calculated as far as possible from a market input should be used; and
(d) Maximum use must be made of relevant observable inputs and market inputs and rely as little as possible on undertaking-specific inputs, minimising the use of unobservable inputs.
4. When valuing liabilities, no adjustments shall be made to take account of the own credit standing of the insurer.
5. Insurers shall follow the GAAP principles it has adopted in the treatment of insurance contracts that do not transfer significant insurance risk,
6. The exceptions to these principles are mainly related to line items affecting the valuation of insurance technical provisions.
7. All contractual liabilities or contingent liabilities arising from off-balance sheet arrangements are to be recognised on the EBS. Contractual liabilities should be valued consistently with GAAP principles. In cases where the GAAP principles do not require fair value, the insurer should value the contractual liabilities using the valuation hierarchy in paragraph 3. Contingent liabilities shall be valued based on the expected present value of future cash-flows required to settle the contingent liability over the lifetime of that contingent liability, using the basic risk-free interest rate. Where the present value of contingent obligations cannot be determined, the liability should be valued at its undiscounted value.

\section*{Economic Balance Sheet valuation principles - technical provisions}
8. Technical provisions shall be valued at an economic value using the best estimate of probability weighted cash flows, with an additional risk margin. Cash flows, for this purpose, shall take into account all future cash in and out flows required to settle the insurance obligations attributable to the remaining lifetime of the policy. In particular, they shall include:
(a) All claims payments / benefit payments expected to be made to policyholders, third party claimants or other beneficiaries;
(b) All expenses that are expected to be incurred in servicing insurance and reinsurance obligations over their lifetime, including:
(i) Claims management expenses;
(ii) Acquisition costs;
(iii) Administrative expenses;
(iv) Investment management expenses;
(v) Overhead costs associated with the above;
(c) Any expected future premiums due after the valuation date;
(d) Any expected salvage and subrogation recoveries;
(e) Any taxation payments which are, or are expected to be, charged to policyholders or are required to settle the insurance obligations; and
(f) Any expected cash flows (both inwards and outwards) related to outwards reinsurance arrangements, making due allowance for any expected shortfall in amounts to be collected due to counterparty default (for whatever reason, including reinsurer insolvency or contractual dispute).
9. The remaining lifetime of the policy referred to in paragraph 8 above is defined to continue up to the point at which:
(a) The insurer is no longer required to provide coverage;
(b) The insurer has the right or the practical ability to reassess the risk of the particular policyholder and, as a result, can set a price that fully reflects that risk; and
(c) The insurer has the right or the practical ability to reassess the risk of the portfolio that contains the policy and, as a result can set a price that fully reflects the risk of that portfolio.
10. Technical provisions shall be calculated gross of reinsurance, with a separate assessment of amounts expected to be recovered from reinsurers consistent with the gross assessment.
11. Where the insurer has committed to write a policy with an inception date after the valuation date, and the terms of that policy cannot be changed unilaterally by the insurer, then that policy shall be included in the best estimate ("Bound But Not Incepted" business or BBNI business).
12. Assumptions underlying the calculation of technical provisions shall be based on current expected experience, using expert judgment where necessary, and shall reflect expected policyholder behavior and future management actions.
13. The best estimate shall take into account all material guarantees and contractual options included in the policy, and in particular those whose value could be influenced by changes in prevailing economic conditions. This shall include non-balance sheet reserves such as those set out under Modified Coinsurance arrangements under paragraph "(k)" of THE INSTRUCTIONS AFFECTING PART V: The corresponding assets supporting these modified coinsurance arrangements shall be included in Lines 1 to 15 of Form 4EBS.
14. The valuation shall reflect the time value of money, using a risk free discount rate curve, which may be adjusted to reflect certain risk characteristics of the liability. The Authority will supply risk free discount curves for a number of the major currencies, and these shall be used where appropriate. However insurer may use alternative risk free curves (eg those approved for use in Solvency II) provided that they obtain prior approval from the Authority. Details of the approach used for determining the risk free discount rate curves will be directed by the Authority.
15. Insurers will be permitted to include an adjustment to the risk-free discount rate curve to partially reflect the illiquidity premium implicit in typical underlying assets, as well as making allowance for the prevention of pro-cyclical investment behaviour (the 'standard approach'). The Authority will supply discount curves including this adjustment for a number of major currencies, and provide further details of the approach adopted so that insurers can produce rates for other currencies if needed. Details of the approach used for determining the 'standard approach' discount rate curves will be directed by the Authority.
16. Insurers may also elect to adopt the 'scenario based approach' for some or all of their business. This approach is designed to capture both the sensitivity to interest rates and the degree to which assets and liabilities are cash flow matched. It consists of a base scenario using the actual portfolio of assets supporting the business (adjusted for expected default costs) and a range of interest rate stresses to determine the amount by which the market yield should be reduced to reflect interest rate risk and asset-liability mismatching. Details of the approach, including the conditions under which it may be adopted will be directed by the Authority.
17. Where future cash flows associated with Long-Term insurance obligations can be replicated reliably using financial instruments for which a reliable market value is observable, the value of technical provisions associated with those future cash flows may be determined on the basis of the market price of those financial instruments. This approach to calculating technical provisions 'as a whole' does not then require the calculation of an explicit separate risk margin.
18. The risk margin shall be calculated using the cost of capital method, and reflect the cost of holding an ECR level of capital in respect of insurance risk, credit risk, and operational risk. A \(6 \%\) cost of capital rate shall be used. The assessment shall cover the full period needed to runoff the insurance liabilities (excluding those determined based on the approach set out in paragraph 17 and be discounted using the risk free discount curve. The risk margin shall be calculated at separately for general business and Long-Term business making allowance for the effects of the diversification of regulatory capital requirements within the insurer.
19. Subject to prior approval of the Authority, insurers may elect to make use of transitional arrangements to calculate some or all of their best estimate Long-Term business insurance provisions. This applies only for Long-term business in force at 31 December 2015 for which the standard based approach has been applied. Under the transitional arrangement, the insurer would calculate technical provisions using the EBS approach set out in paragraphs 815 above (and using the standard approach for the risk free discount rate), and also using approaches consistent with the current approach (defined as the valuation approach in force at 31 December 2015). The insurer would then interpolate linearly between the 2 values, such that the current approach applies for year end 31 December 2015 and the full EBS approach would apply 16 years later at year end 31 December 2032.
20. Subject to prior approval of the Authority, insurers may elect to produce some or all of their EBS using Solvency II principles, or such other economic valuation principles that the Authority has approved in advance for this purpose.

\section*{PART XV (Paragraph 6)}

\section*{APPROVED ACTUARY'S OPINION}

The approved actuary's Opinion must state whether or not, in the opinion of the approved actuary, the aggregate amount of technical provisions shown at Line 27C in the Statutory Economic Balance Sheet as at the end of the relevant financial year:
(a) meets the requirements of the Insurance Act 1978 and related rules and regulations;
(b) makes reasonable provision for the total technical provisions of the insurer under the terms of its insurance contracts and agreements.

The approved actuary shall state their own best estimates (and/or ranges for the best estimates) and confirm that such estimates have been determined in accordance with the requirements set out in Schedule XIV. The approved actuary shall also state (but is not limited to) their best estimates for following matters (as applicable):
\begin{tabular}{ll} 
(a) & Line 27(a) \\
(b) & Line 27(d) \\
(c) & Line 27B(a) \\
(d) & Line 27B(d)
\end{tabular}

The approved actuary is required to state their estimates for the risk margin (Line 27A) and state whether or not, in their opinion, this amount has been calculated in accordance with the requirements of Part XIV.

In relation to Lines 27 (a) and 27B(a), the approved actuary shall provide commentary on the assumptions made in relation to Bound But Not Incepted business, as described in paragraph 11 of the Economic Balance Sheet valuation principles set out in Part XIV

5 The approved actuary shall provide commentary for Lines 27(d) and 27B(d on the assumptions made for expected losses due to counterparty default (for whatever reason, including reinsurer insolvency or contractual dispute) in relation to reinsurance recoveries.

In relation to Lines 27B (a) and 27B(d), the approved actuary shall provide commentary on the nature of the business valued 'as a whole' and whether or not their approach is in accordance with the requirements of Part XIV.

7 Where the approved actuary has not used risk discount curves provided by the Authority they shall state the rates used for calculation and provide commentary on how they were derived.

8 Where the Insurer has made use of the 16 year transitional arrangements for certain insurance business, the approved actuary shall provide estimates for that business for both the EBS approach and the approach consistent with the valuation approach in force before EBS requirements came into force as referred to in paragraph 19 of the Economic Balance Sheet valuation principles as set out in Part XIV.

9 The approved actuary shall provide commentary on any aspects of the technical provisions of the insurer which give rise to greater levels of uncertainty than would typically be associated with the insurer's business.

The approved actuary's Opinion shall further confirm:
(a) the approved actuary's name, employer and professional designations attained (which qualifies them to issue the opinion and formed the basis for their
application to the Authority for approval as Approved Actuary) ;
(b) whether or not the approved actuary continues to be a qualified member in good standing of all official actuarial bodies included in their application to the Authority for approval;
(c) whether or not the approved actuary is in full compliance with the most recent Continuing Professional Development requirements of their official actuarial body;
(d) whether or not the approved actuary has any perceived conflicts of interest relative to providing the opinion.
(e) whether or not the work supporting the Opinion complies with applicable standards of actuarial practice.

11 Working papers supporting the approved actuary's Opinion are required to be made available to the Authority by the approved actuary upon request and should be sufficient in and of themselves to enable the completion of an independent review of the Opinion and supporting analysis by another unrelated but experienced actuary.

12 The opinion shall be signed and dated by the approved actuary and must include their current contact information, including but not limited to, telephone number and email address.

\section*{INSTRUCTIONS AFFECTING PART XXIA:}
(a) disclosure of an insurer's ten largest exposures to single counterparty risk by reporting the name, the exposure and allocation by asset type, bond or mortgage type (if applicable), BSCR Rating (if applicable) and asset value consistent with Form 4EBS.
(b) for the purposes of this Part, a counterparty shall include all related or connected counterparties captured by either of the following criteria:
(i) controller relationship: if a counterparty, directly or indirectly, has control of (as a result of its majority shareholding in or significant influence) the other counterparties; or
(ii) economic interdependence: if one of the counterparties were to experience financial difficulties which directly or indirectly affect the ability of any or all of the remaining counterparties to perform their financial obligations (for example where a counterparty becomes unable to fund or repay certain financial contractual obligations, and as a result, other counterparties, are likely to be unable to fund or repay certain obligations imposed on them);
(c) asset Type (Column A) shall be determined by the insurer as one of the following:
(i) cash and cash equivalents (as defined in Part XIX Column B Parts IIB, IIC, IID, IIE, and IIF Column (1), Line 68);
(ii) quoted and Unquoted Investments (as defined in Parts IIB, IIC, IID, IIE, and IIF Column (11), Line 14);
(iii) equity holdings (as defined in Parts IIB, IIC, IID, IIE, and IIF Column (11), Line 37);
(iv) credit derivatives (as defined in Parts IIB, IIC, IID, IIE, and IIF Columns (1), (3), (5), (7) Lines 47 and 57);
(v) advances to Affiliates (reported on Form 4EBS, Line 4(g));
(vi) policy Loans (reported on Form 4EBS, Line 6);
(vii) real Estate 1 (reported on Form 4EBS, Line 7(a));
(viii) real Estate 2 (reported on Form 4EBS, Line 7(b));
(ix) collateral Loans (reported on Form 4EBS, Line 8);
(x) for equity exposures that are grandfathered according to paragraph 23A of Schedule XIII, the appropriate asset type given in Instructions affecting Part XXI, point (iii).
(d) when reporting asset sub-type (under Column B) shall provide further details of the type of asset as included in Table 1, Table 2 or Table 8 as appropriate;
(e) when applying the BSCR Rating (under Column C) the insurer shall apply the BSCR rating that was allocated to the asset when it was included in Table 1, Table 2 or Table 8 as appropriate;
(f) asset value (under Column D) shall be the value of the asset as required by the Economic Balance Sheet valuation principles as set out in Part XIV; and
(g) amounts shall be reported on both an EBS Valuation and unconsolidated basis.

\section*{PART XXII \\ SCHEDULE OF ANTI-MONEY LAUNDERING AND ANTI-TERRORIST FINANCING ("AML/ATF")}

Every insurer that writes long-term business shall be required to complete the questions set out in the Schedule of Anti-Money Laundering/Anti-Terrorist Financing ("Schedule") in relation to its long term business but excluding any reinsurance business and provide particulars of its gross written premiums on a consolidated basis for the relevant year. The Schedule is comprised of the following:
(a) Table I - Insurers are required to complete in order to provide the Authority with the data required to determine the extent of an insurer's exposure or potential exposure to Money Laundering ("ML") and Terrorist Financing ("TF") risks.
(b) Table II - Insurers are required to complete in order to provide the Authority with an understanding of the insurer's AML/ATF corporate governance framework, including but not limited to; employee training, knowledge, integrity, and compliance with established AML/ATF policies and procedures.

\section*{INSTRUCTIONS AFFECTING FORM 4EBS}

\section*{Economic Balance Sheet valuation principles}
1. The economic balance sheet (EBS) shall be produced on a consolidated basis in line with GAAP principles adopted by the insurer, as notified and agreed by the Authority ("GAAP Principles"). Except where specifically mentioned below, the consolidated assets and liabilities shall be assessed and fair-valued in line with the GAAP principles adopted by the insurer, as notified to and agreed by the Authority.
2. For cases where the GAAP principles permit both a fair value model and a non-economic valuation model for valuing an asset or liability, the insurer shall apply the fair value model.
3. For cases where the GAAP principles do not require an economic valuation the insurer shall fair value the asset or liability using the following hierarchy of high level principles of valuation of assets and liabilities:
(a) Quoted market prices in active markets for the same or similar assets or liabilities must be used whenever possible;
(b) Where the use of quoted market prices for the same assets or liabilities is not possible, quoted market prices in active markets for similar assets and liabilities with adjustments to reflect differences shall be used;
(c) If there are no quoted market prices in active markets available, mark-to-model techniques, which are alternative valuation techniques that have to be benchmarked, extrapolated or otherwise calculated as far as possible from a market input should be used; and
(d) Maximum use must be made of relevant observable inputs and market inputs and rely as little as possible on undertaking-specific inputs, minimising the use of unobservable inputs.
4. When valuing liabilities, no adjustments shall be made to take account of the own credit standing of the insurer.
5. Insurers shall follow the GAAP principles it has adopted in the treatment of insurance contracts that do not transfer significant insurance risk,
6. The exceptions to these principles are mainly related to line items affecting the valuation of insurance technical provisions.
7. All contractual liabilities or contingent liabilities arising from off-balance sheet arrangements are to be recognised on the EBS. Contractual liabilities should be valued consistently with GAAP principles. In cases where the GAAP principles do not require fair value, the insurer should value the contractual liabilities using the valuation hierarchy in paragraph 3. Contingent liabilities shall be valued based on the expected present value of future cash-flows required to settle the contingent liability over the lifetime of that contingent liability, using the basic risk-free interest rate. Where the present value of contingent obligations cannot be determined, the liability should be valued at its undiscounted value.

\section*{Economic Balance Sheet valuation principles - technical provisions}
8. Technical provisions shall be valued at an economic value using the best estimate of probability weighted cash flows, with an additional risk margin. Cash flows, for this purpose, shall take into account all future cash in and out flows required to settle the insurance obligations attributable to the remaining lifetime of the policy. In particular, they shall include:
(a) All claims payments / benefit payments expected to be made to policyholders, third party claimants or other beneficiaries;
(b) All expenses that are expected to be incurred in servicing insurance and reinsurance obligations over their lifetime, including:
(i) Claims management expenses;
(ii) Acquisition costs;
(iii) Administrative expenses;
(iv) Investment management expenses;
(v) Overhead costs associated with the above;
(c) Any expected future premiums due after the valuation date;
(d) Any expected salvage and subrogation recoveries;
(e) Any taxation payments which are, or are expected to be, charged to policyholders or are required to settle the insurance obligations; and
(f) Any expected cash flows (both inwards and outwards) related to outwards reinsurance arrangements, making due allowance for any expected shortfall in amounts to be collected due to counterparty default (for whatever reason, including reinsurer insolvency or contractual dispute).
9. The remaining lifetime of the policy referred to in paragraph 8 above is defined to continue up to the point at which:
(a) The insurer is no longer required to provide coverage;
(b) The insurer has the right or the practical ability to reassess the risk of the particular policyholder and, as a result, can set a price that fully reflects that risk; and
(c) The insurer has the right or the practical ability to reassess the risk of the portfolio that contains the policy and, as a result can set a price that fully reflects the risk of that portfolio.
10. Technical provisions shall be calculated gross of reinsurance, with a separate assessment of amounts expected to be recovered from reinsurers consistent with the gross assessment.
11. Where the insurer has committed to write a policy with an inception date after the valuation date, and the terms of that policy cannot be changed unilaterally by the insurer, then that policy shall be included in the best estimate ("Bound But Not Incepted" business or BBNI business).
12. Assumptions underlying the calculation of technical provisions shall be based on current expected experience, using expert judgment where necessary, and shall reflect expected policyholder behavior and future management actions.
13. The best estimate shall take into account all material guarantees and contractual options included in the policy, and in particular those whose value could be influenced by changes in prevailing economic conditions. This shall include non-balance sheet reserves such as those set out under Modified Coinsurance arrangements under paragraph "(n)" of THE INSTRUCTIONS AFFECTING SCHEDULE V: The corresponding assets supporting these modified coinsurance arrangements shall be included in Lines 1 to 15 of Form 4EBS.
14. The valuation shall reflect the time value of money, using a risk free discount rate curve, which may be adjusted to reflect certain risk characteristics of the liability. The Authority will supply risk free discount curves for a number of the major currencies, and these shall be used where appropriate. However insurer may use alternative risk free curves (eg those approved for use in Solvency II) provided that they obtain prior approval from the Authority. Details of the approach used for determining the risk free discount rate curves will be directed by the Authority.
15. Insurers will be permitted to include an adjustment to the risk-free discount rate curve to partially reflect the illiquidity premium implicit in typical underlying assets, as well as making
allowance for the prevention of pro-cyclical investment behaviour (the 'standard approach'). The Authority will supply discount curves including this adjustment for a number of major currencies, and provide further details of the approach adopted so that insurers can produce rates for other currencies if needed. Details of the approach used for determining the 'standard approach' discount rate curves will be directed by the Authority.
16. Insurers may also elect to adopt the 'scenario based approach' for some or all of their business. This approach is designed to capture both the sensitivity to interest rates and the degree to which assets and liabilities are cash flow matched. It consists of a base scenario using the actual portfolio of assets supporting the business (adjusted for expected default costs) and a range of interest rate stresses to determine the amount by which the market yield should be reduced to reflect interest rate risk and asset-liability mismatching. Details of the approach, including the conditions under which it may be adopted will be directed by the Authority.
17. Where future cash flows associated with Long-Term insurance obligations can be replicated reliably using financial instruments for which a reliable market value is observable, the value of technical provisions associated with those future cash flows may be determined on the basis of the market price of those financial instruments. This approach to calculating technical provisions 'as a whole' does not then require the calculation of an explicit separate risk margin.
18. The risk margin shall be calculated using the cost of capital method, and reflect the cost of holding an ECR level of capital in respect of insurance risk, credit risk, and operational risk. A \(6 \%\) cost of capital rate shall be used. The assessment shall cover the full period needed to runoff the insurance liabilities (excluding those determined based on the approach set out in paragraph 17 and be discounted using the risk free discount curve. The risk margin shall be calculated at separately for general business and Long-Term business making allowance for the effects of the diversification of regulatory capital requirements within the insurer.
19. Subject to prior approval of the Authority, insurers may elect to make use of transitional arrangements to calculate some or all of their best estimate Long-Term business insurance provisions. This applies only for Long-term business in force at 31 December 2015 for which the standard based approach has been applied. Under the transitional arrangement, the insurer would calculate technical provisions using the EBS approach set out in paragraphs 815 above (and using the standard approach for the risk free discount rate), and also using approaches consistent with the current approach (defined as the valuation approach in force at 31 December 2015). The insurer would then interpolate linearly between the 2 values, such that the current approach applies for year end 31 December 2015 and the full EBS approach would apply 16 years later at year end 31 December 2032.
20. Subject to prior approval of the Authority, insurers may elect to produce some or all of their EBS using Solvency II principles, or such other economic valuation principles that the Authority has approved in advance for this purpose.

\section*{SCHEDULE XV (Paragraph 6)}

\section*{APPROVED ACTUARY'S OPINION}

The approved actuary's Opinion must state whether or not, in the opinion of the approved actuary, the aggregate amount of technical provisions shown at Line 27C in the Statutory Economic Balance Sheet as at the end of the relevant financial year:
(c) meets the requirements of the Insurance Act 1978 and related rules and regulations;
(d) makes reasonable provision for the total technical provisions of the insurer under the terms of its insurance contracts and agreements.

The approved actuary shall state their own best estimates (and/or ranges for the best estimates) and confirm that such estimates have been determined in accordance with the requirements set out in Schedule XIV. The approved actuary shall also state (but is not limited to) their best estimates for following matters (as applicable):
(a) Line 27(a)
(b) Line 27(d)
(c) Line 27B(a)
(d) Line 27 B (d)

The approved actuary is required to state their estimates for the risk margin (Line 27A) and state whether or not, in their opinion, this amount has been calculated in accordance with the requirements of Schedule XIV.

In relation to Lines 27 (a) and \(27 \mathrm{~B}(\mathrm{a})\), the approved actuary shall provide commentary on the assumptions made in relation to Bound But Not Incepted business, as described in paragraph 11 of the Economic Balance Sheet valuation principles set out in Schedule XIV

5 The approved actuary shall provide commentary for Lines 27(d) and 27B(d on the assumptions made for expected losses due to counterparty default (for whatever reason, including reinsurer insolvency or contractual dispute) in relation to reinsurance recoveries.

6 In relation to Lines 27B (a) and 27B(d), the approved actuary shall provide commentary on the nature of the business valued 'as a whole' and whether or not their approach is in accordance with the requirements of Schedule XIV.

7 Where the approved actuary has not used "risk discount curves" provided by the Authority they shall state the rates used for calculation and provide commentary on how they were derived.

8 Where the Insurer has made use of the 16 year transitional arrangements for certain insurance business, the approved actuary shall provide estimates for that business for both the EBS approach and the approach consistent with the valuation approach in force before EBS requirements came into force as referred to in paragraph 19 of the Economic Balance Sheet valuation principles set out in Schedule XIV.

9 The approved actuary shall provide commentary on any aspects of the technical provisions of the insurer which give rise to greater levels of uncertainty than would typically be associated with the insurer's business.

The approved actuary's Opinion shall further confirm:
(a) the approved actuary's name, employer and professional designations attained (which qualifies them to issue the opinion and formed the basis for their application to the Authority for approval as Approved Actuary) ;
(b) whether or not the approved actuary continues to be a qualified member in good standing of all official actuarial bodies included in their application to the Authority for approval;
(c) whether or not the approved actuary is in full compliance with the most recent Continuing Professional Development requirements of their official actuarial body;
(d) whether or not the approved actuary has any perceived conflicts of interest relative to providing the opinion.
(e) whether or not the work supporting the Opinion complies with applicable standards of actuarial practice.

11 Working papers supporting the approved actuary's Opinion are required to be made available to the Authority by the approved actuary upon request and should be sufficient in and of themselves to enable the completion of an independent review of the Opinion and supporting analysis by another unrelated but experienced actuary.

12 The opinion shall be signed and dated by the approved actuary and must include their current contact information, including but not limited to, telephone number and email address.

\section*{INSTRUCTIONS AFFECTING SCHEDULE XVIII:}
(a) Particulars of reinsurance balances shall disclose at least the ten largest reinsurance exposures with the remaining reinsurance exposures grouped according to BSCR ratings and/or a single consolidated reinsurance exposure, including basis -
(i) the name of reinsurer;
(ii) the BSCR rating;
(iii) the amount of reinsurance balances receivable, funds held by ceding reinsurers, and reinsurance recoverable balance (as reflected in Form 4EBS, Lines \(11(\mathrm{e}), 12(\mathrm{c})\) and 27(c));
(iv) funds held by ceding reinsurers (as reflected in Form 4EBS, Line 12(c), in paragraph (iii) above), shall be included only to the extent that they are not already included under Schedule IIA;
(v) the amount of reinsurance balances payable and other payables (as reflected in Form 4EBS, Lines 28, 29, 33, and 34(c)) to the extent that they are attributable to that particular reinsurer or reinsurance exposure balance;
(vi) the amount of any collateral placed in favour of the insurer relating to the reinsurance balances (as reflected in Notes to Form 4EBS, Lines 11(e) and 27(c));
(vii) the amount of qualifying collateral shall be the collateral amount in (vi) less a \(2 \%\) reduction to account for the market risk associated with the underlying collateral assets but, at all times, the qualifying collateral shall not exceed the net exposure, which is the difference between amounts in (iii) and (v);
(viii) the net qualifying exposure shall be the amount under (iii) less the amounts under both (v) and (vii) above; and
(ix) for the purposes of this Schedule, the appropriate BSCR rating shall be determined as follows-
(A) based on either the rating of the reinsurer or the rating of the letters of credit issuer, if any, whichever is higher;
(B) where the letters of credit does not relate to the entire reinsurance exposure, the reinsurance exposure should be separated to reflect the rating of that portion of the exposure which is covered by the letters of credit and the rating of that portion of the exposure which is not;
(C) where the reinsurer is a domestic affiliate, it shall be assigned a BSCR rating of 0 regardless of
(D) where a reinsurer is not rated but is regulated in a jurisdiction that applies the International Association of Insurance Supervisors' Insurance Core Principles ("IAIS' ICPs") and in particular imposes both a minimum capital requirement ("MCR") and a prescribed capital requirement ("PCR") and fully meets its PCR in that jurisdiction, it shall be assigned a BSCR rating of 4 or otherwise, it shall be assigned a BSCR rating of 8; and
(E) where the insurer has disclosed a single consolidated reinsurance exposure, that exposure shall be assigned a BSCR rating of 8 ;
