REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Board of Directors Xpedition Re Limited

Opinion

We have audited the financial statements of Xpedition Re Limited (incorporated in Bermuda) (the "Company"), which comprise the balance sheet as of December 31, 2022, and the related statements of income and comprehensive income, changes in shareholder's equity, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2022, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for opinion

We conducted our audit of the financial statements in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Other matter

The financial statements of the Company as of and for the year ended December 31, 2021, were audited by other auditors who expressed an unmodified opinion on those financial statements in their report dated May 31, 2022.

Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design
 audit procedures that are appropriate in the circumstances, but not for the
 purpose of expressing an opinion on the effectiveness of the Company's internal
 control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required supplementary information

Grant Thornton LLP

Management has omitted the required supplemental information pertaining to Short-Duration Contracts disclosures that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information is the responsibility of management and, although not a required part of the basic financial statements, is required by Financial Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Notes to Financial Statements **December 31, 2022**

(expressed in U.S. dollars)

1. The Company

Xpedition Re Limited (the "Company"), a wholly-owned subsidiary of Xpedition Re Holdings Limited (the "Parent"), was incorporated in Bermuda on May 23, 2017 and is registered as a Class 3A insurer under The Insurance Act 1978, amendments thereto and related regulations ("The Act") as of December 22, 2017. The Company reinsures travel risks written through an affiliated managing general agent. The reinsurance agreement commenced on January 1, 2018 and the Company's participation in these risks thereafter have been equal to a 100% quota share of the total business produced by UnivOps Insurance Services LLC ("UnivOps"), and written by select companies within the State National Group.

2. Significant accounting policies

These financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts of assets and liabilities, as well as disclosure of contingent assets and liabilities as at the balance sheet date. Estimates also affect the reported amounts of income and expenses for the reporting period. Actual results could differ from those estimates.

The following is a summary of the significant accounting policies adopted by the Company:

(a) Cash and cash equivalents

Cash includes amounts held in financial institutions in operating accounts, treasury bills, and money market funds. The Company considers money market funds and securities with maturities within 3 months of the purchase date to be equivalent to cash. The carrying amount approximates fair value because of the short maturity of these investments.

(b) Premiums written and unearned premiums

Premiums are recognized as revenue on a pro-rated basis over the period of the exposure. The exposure period is determined to be the date from which the policy was sold to the date the respective travel ends. The unearned portion of premiums is deferred on the balance sheet.

(c) Acquisition costs and deferred acquisition costs

Acquisition costs are comprised of ceding commissions, general agent commissions, partner commissions, and premium taxes that relate directly to the acquisition of premium.

Deferred acquisition costs are recognized in expenses on a pro-rated basis over the exposure period which is the date from which the policy was sold to the date the respective travel ends.

A premium deficiency exists if the sum of expected losses and loss adjusted expense and deferred acquisition costs exceed the related unearned premiums (and, if appropriate, expected future premium). In this event, deferred acquisition costs are immediately expensed to the extent necessary to eliminate the premium deficiency. The Company does not consider investment income in the calculation according to ASC 944-60-50.

(d) Loss and loss expenses

Losses and loss expenses are recognised as incurred and are based on the estimated ultimate cost of settlement. Measures of experience and judgement are involved in assessing outstanding liabilities, the ultimate cost of which may not be known with certainty at the balance sheet date.

Notes to Financial Statements **December 31, 2022**

(expressed in U.S. dollars)

2. Significant accounting policies (cont'd)

Such liabilities are necessarily based on estimates and while the directors and management believe that the amounts are fairly stated, the ultimate liability may be in excess of, or less than, he amounts provided.

(e) Loss and loss expense provisions

The provision for unpaid claims and claims expenses includes losses reported at the balance sheet date and an amount, based on past experience, for losses incurred but not reported ("IBNR"). The Company provides IBNR based on an analysis of the loss experience of the risks insured and the recommendations of independent actuaries. Adjustments to estimates will be included in the financial statements of subsequent periods when such adjustments become known.

(f) Fair value of financial instruments

Fair values of financial instruments are disclosed in the notes to the financial statements when they differ from the carrying values. Where amounts receivable and payable are subject to normal credit terms, their carrying values are used as an approximation of their fair values.

- Level 1 inputs are based upon quoted prices for identical instruments traded in active markets.
- Level 2 inputs are based upon quoted prices for similar instruments in active markets, quoted prices for similar or identical instruments in inactive markets and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets and liabilities.
- Level 3 inputs are generally unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability. The fair values are therefore determined using model-based techniques that include option pricing models, discounted cash flow models and similar valuation techniques.

(a) Investments

Fixed interest securities are classified as available-for-sale and are carried at fair value with the unrealized holding gain or loss reported in a separate component of accumulated other comprehensive (loss).

Interest income is recognized on an accrual basis. Premium or discount on fixed interest securities purchased at amounts different from their par value are amortized using the straight line method.

Realized gains and losses on sales of investments classified as available-for-sale are recognized in investment income on the specific identification basis.

Investments are periodically reviewed to determine if they have sustained an impairment of value that is considered to be other than temporary. If investments are determined to be other than temporarily impaired, the cost basis of the investment is written down to fair value and a corresponding realized loss is recognized in investment income in the period in which it is determined. The Company recorded no other than temporarily impairments on its investments during 2022 and 2021.

(h) Investment income

Investment income includes amounts received and accrued in respect of periodic interest ("Coupons") payable to the Company by the issuer of the fixed income securities.

Notes to Financial Statements **December 31, 2022**

(expressed in U.S. dollars)

2. Significant accounting policies (cont'd)

(I) Use of estimates

The financial statements include amounts based on informed estimates and judgements of management for those transactions that are not yet complete or for which the ultimate effects cannot be precisely determined. Such estimates and judgements affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during that reporting period. Actual results could differ from those estimates to the balance sheet date.

3. Restricted balances

Under the terms of the reinsurance agreement, the Company has established a trust account for the benefit of the ceding insurer as security for the Company's obligations for losses, loss expenses, and unearned premiums. The fair value of restricted assets in the trust accounts as a December 31, 2022 is \$13,294,796 (2021 - \$7,379,685) and is comprised of \$5,492,530 (2021 - \$2,485,074) of cash and \$7,802,266 (2021 - \$4,894,610) of investments.

4. Investments – available for sale securities

The amortized cost and estimated fair value of available for sale investments is as follows:

As at December 31, 2022	Amortized cost	Gross unrealized gains \$	Gross unrealized losses \$	Fair value \$

Total	5,512,272	873,935
Balance - End of period	3,724,395	1,325,726

Losses incurred related to prior periods of \$2,077,098 (2021 - \$76,543) are the result of unfavourable movement in 2021 loss provisions.

Reserving Methodology

The Company uses a combination of methods to project ultimate losses for all lines of business, which include:

- Expected Loss Ratio Method
- Paid Bornhuetter-Ferguson Method
- Incurred Bornhuetter-Ferguson Method
- Expected Loss Ratio Method In the Expected Loss Ratio method, the ultimate losses are estimated by multiplying the earned premium by a selected ultimate loss ratio. The Expected Loss Ratio method was also used to estimate expected losses for the Expected Paid Emergence method. The selected ultimate loss ratio was based on the third party actuary's review of the company's data and insurance industry data.
- Paid Bornhuetter-Ferguson Method The Paid Bornhuetter-Ferguson method estimates ultimate losses
 as the sum of two components: actual paid losses and expected unpaid losses. To estimate the expected
 unpaid losses, the Paid Bornhuetter-Ferguson method requires paid loss development factors (LDFs) and an
 initial expectation of the ultimate loss amount. The payment patterns associated with the LDFs imply that a
 specific percentage of the ultimate loss will be paid after the evaluation date.

Notes to Financial Statements **December 31, 2022**

(expressed in U.S. dollars)

5. Provision for loss and loss expenses (cont'd)

The amount of unpaid loss is estimated by applying this percentage to the expected ultimate loss. As stated above, the expected ultimate losses are based on the Expected Loss Ratio method.

• Incurred Bornhuetter-Ferguson Method – The Incurred Bornhuetter-Ferguson method is similar to the Paid Bornhuetter-Ferguson method, except that incurred losses are used in place of paid losses and the method estimates expected IBNR reserves in place of expected unpaid losses. Estimated ultimate losses are equal to the sum of two components: actual incurred losses reported to date and expected unreported losses (or expected IBNR reserves). To estimate the expected IBNR reserves, the Incurred Bornhuetter-Ferguson method requires incurred LDFs and an initial expectation of the ultimate loss amount. The reporting patterns associated with the LDFs imply that a specific percentage of the ultimate loss will be reported after the evaluation date. The amount of unreported loss is estimated by applying this percentage to the expected ultimate loss.

6. Provision for unpaid claims and claims expenses

In determining management's best estimate of the reserves for losses and loss adjustment expenses as at December 31, 2022, consideration was given both to the input of the Company's engaged third party actuary estimate and a number of other internal and external factors, including:

- Competitive changes within the industry;
- Geographic / industry concentrations;
- · Access to capital markets;
- Legislative and judicial changes in the jurisdictions in which the Company writes insurance business;
- Industry experience.

The following factors are relevant to the additional information included in the tables below:

- Table Organization: The tables are organized by accident period and include policies written on an
 occurrence basis.
- **Groupings:** We believe our policies have homogenous risk characteristics with similar development patterns and would generally be subject to similar trends and therefore are presented as one grouping.
- Claim counts: We consider a reported claim to be one claim for each claimant for each loss occurrence.
- There are limitations that should be considered on the reported claim count data in the tables below, including:
 - Claim counts are presented only on a reported (not an ultimate) basis.

1) Schedules of incurred and paid losses and loss adjustment expenses by accident period

a) Travel:

Incurred losses and loss adjustment expenses by accident period, undiscounted and net of reinsurance recoveries. The prior year figures in the following table are unaudited.

7. Contributed Surplus

During the year ended December 31, 2022, members contributed additional capital of \$3,254,493 (2021-\$3,994,313) to the Company.

8. Concentration of risk

The Company issues contracts that transfer insurance risks or financial risks or both. This section summarises these risks and the way the Company manages them.

(a) Insurance risk

The main insurance risk is that claims exceed net premiums less acquisition costs. The objective of the Company is to ensure that sufficient reserves are available to cover these liabilities. The Company's actuary prepares annual reserving analysis to manage this risk. By nature of the coverage liabilities are typically short term in nature.

(b) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: interest rate risk, Currency risk and other price risk.

The estimates of fair values presented herein are subjective in nature and are not necessarily indicative of the amounts that the Company would actually realize in a current market exchange. However, any differences would not be expected to be material.

i) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to change in market interest rates. The Company is exposed to minimal interest rate risk; all cash reserves are in cash and cash equivalents and all investments are in US Treasury securities.

ii) Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign currency exchange rates. The company has no exposure to currency risk as the company transacts in US dollars only.

iii) Other price risk

Other price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company has no exposure to other price risk.

(c) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in obtaining funds to meet its commitments. Trust accounts are in place to ensure that the Company is able to meet liabilities arising from claims and all other obligations as per the terms of the reinsurance agreement.

8. Concentration of risk (Cont'd)

(d) Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge on obligations and thereby causes financial loss to another party. The Company's credit risk is primarily attributed to cash and cash equivalents at a bank, investments held by a bank, and premium receivables. At December 31, 2022, cash at a bank amounts to \$200,435 (2021 - \$212,998) and are with a bank with a high credit rating (A- by S&P). Cash and cash equivalents in the investment custody account and trust accounts amounts to \$5,492,530 (2021 - \$2,705,682) and are with a financial institution with a high credit rating (A- by S&P). Investments totaling \$7,802,266 (2021 - \$4,862,199) are with a financial institution with a high credit rating (A- by S&P).

At December 31, 2022 there was \$2,170,270 (2021 - \$2,092,314) premium receivable due from a related party without a credit rating.

9. Related party transactions

At December 31, 2022, there was a premiums receivable balance from a related party totalling \$2,170,270 (2021 - \$2,092,314).

At December 31, 2022, there were amounts for various administrative services receivable from the Parent \$7,062 (2021 - \$7,062) and Payable to UnivOps \$3,757 (2021 - \$3,757), respectively.

10. Statutory capital

Under The Act, the Company is required to meet certain minimum statutory capital and surplus requirements. At December 31, 2022, the Company's statutory capital and surplus was \$6,915,227 (2021 - \$6,361,940) and the minimum required statutory capital and surplus was \$1,395,000.

The Company is required to maintain a minimum liquidity ratio, which was met for the period.

11. Share capital

The Company has authorized, issued and fully paid in capital of 120,000 common shares at a par value of \$1 each.

12. Premium deficiency

As of December 31, 2022 the Company had \$728,727 liabilities (2021 - \$305,760) related to premium deficiency applied against deferred acquisition costs.

13. Taxation

Bermuda

The Company has received an undertaking from the Bermuda government exempting it from all local income, withholding and capital gains taxes until March 31, 2035. At present time no such taxes are levied in Bermuda.

United States

The Company does not consider itself to be engaged in trade or business in the United States and, accordingly, does not expect to be subject to United States taxation.

The Company is required to recognize the tax benefits of uncertain tax positions inly where the position is "more likely than not" to be sustained, assuming examination by tax authorities. The Company has not recognized any liabilities for unrecognized tax benefits as a result of this guidance as management believes that the Company does not have any uncertain tax positions.

14. Subsequent events

The Company has evaluated subsequent events through July 14, 2023 which is the date that the financial statements were available to be issued.
